Common Law Court w/ John Smith
Common law is <u>the</u> law of the land (applicable worldwide)
- It's not really from the governments, authorities, agencies, and law enforcement

Statute laws = law of contracts between 2 or more entities
- Developed when countries started trading with each other
  Laws between corporations
- The Cabal usurped common law and replaced it with this
  *If you don't contract with them, they have <u>no</u> jurisdiction over you
- They have manipulation tricks to get you to submit

Governments and agencies around the world <u>are</u> private corporations everywhere you look

Gold fringe = operating under corporate law / law of sea / statute law
around flag

You are born a living child who later develops into a living, breathing man or woman
  Living, breathing human being is not a corporate entity; statute law cannot contract with that
  How they get you = when you register your birth certificate, they create a fictitious name that goes on with you for life, with little tricks (i.e. adding Mr, Ms in front of name)
*The big trick to kid the population is to get people to believe they are their fictitious entity, therefore they can enforce their laws on them

Most police officers won't know they're imposing corporate law to whoever they want to impose their will upon

* *

Your parents were tricked into registering you
For a contract to be valid, there must be full disclosure
Birth certificate is void
Name attached to it is fraudulent, so they cannot use it against you, even in their own system
* There was NO full disclosure
If you accept the legal fiction, you're a slave

Person is a legal entity, NOT a living man/woman

Statute law has everything to do with corporations
They can charge anything in order for State to make money
Known as Maritime law
Not applicable to living men/women

Common Law Court is entirely backed up by everything they do

"I don't consent to any form of legislation/Acts of Parliament."

Statutory legislation can only deal with corporations, NOT living men/women

When you are born, you're born free

* Magna Carta, Declaration of Independence, etc. were created by the State (it's NOT for living men/women)

* Every piece of legislation is created by the State and governments
Not ONE piece of legislation/document was created by living men and women

Every court worldwide is a registered company
* They are there for profit, NOT justice
It's all based on money

Police are registered companies
They are ~~not~~ there to protect the public
* ~~They are there to collect money, to charge you, to penalize you~~
They are there to collect profit

Governments are also registered companies

Slavery was ~~never~~ abolished. It's just now cleverly disguised.
"Join our new society. We will give you privileges since you are no longer a slave. You are now a citizen of our society" = they simply made everyone a fictitious corporation and are bound to their rules

The government will only deal with the contractual agreement (Mr/Ms) not a living man/woman

Birth certificate IS contractual agreement

Fictitious legal fiction = ^ to penalize, punish, or give privileges
on documents, bank card,
driver's license

People can establish their position as a living man/woman through CLC by registering birth certificate and claiming fictitious character
Submitting an application and claiming ownership of legal fiction

Statute laws

* State rules^ would apply to a legal fiction, but by you claiming ownership of your legal fiction and/or without your consent, they cannot enforce their rules on you

Legal fiction = BIGGEST scam of the world

Courts can't deal with you if you express your position as a living man/woman
If you accept the Mr/Ms title, you then become the slave and now the rules apply to you

Every day around the world they bind people into slavery through use of the legal fiction
The Courts know this and they'll get you to accept the slave name so they can contract with you, in which they can charge you, penalize you, fine you, and enforce legislation they have because all of it applies to you (if you accept your slave name), and they've taken your implied consent
They use terminology to trap you and when they get the answer they want, they will then have contracted with you, bind you into their system, and if you don't comply, you will be punished
"I cannot see you/I cannot hear you" means they can't deal with you and turn away
The only way they can interact with you is by jointing (aka contractual agreement) with your legal fiction (corporate entity)
When judges say "I'm going to proceed," they completely ignore you and address the legal entity w/o your involvement and prosecute you

Maritime laws

Banks are set up to control currency and restrict the flow of money (they use the same terms as maritime laws)

You have a choice...

Do you wish to accept and use this (legal fiction)?

OR

Establish your position as a living man/woman?

"Do you understand?" when police officer asks you

* Statutory act of Parliament

If you are read a "Covid" legislation law, you respond "That's fine, but it's not applicable to me" as a living man/woman. I stand under common law. I do not stand under your authority, and I don't consent.

Your reply

"No, I do not stand under your authority, and I don't consent"

I'm a living man/woman and it doesn't apply to me.

* This keeps you out of their system and they can't enforce their legislation on you

NEVER refer to yourself as a person (it's a legal entity)

It's all about trickery

Be very careful, especially when you are presented these documents that identifies with your legal entity

* For it (legislation) to become law, the people have to consent

If you do not consent, it is NOT law

COVID legislation (or any other legislation) only becomes law with your consent.

They can't enforce without your consent

There's NO law stating a living man/woman has to wear a mask ("Can you confirm the law in which I as a living man/woman have to wear a mask?")

* As long as you're careful with what you do, do NOT get involved with them AND don't talk too much *
If you get into a detailed conversation, they will trick you into a joint agreement with your legal fiction

* The less you say, the better *

* If they ask you any more questions, say...
"Sorry, I do not answer questions"
Say nothing else, and they can't do anything to you

* By establishing yourself as a living man/woman under common law, you are protected

Companies are registered under statutory laws, which means the legislation rules apply to them and to legal fiction
You can trade a business under common law, which means the rules are not applicable to you (you receive a new registration number)

Two systems

Commercial	Common Law
(run by govt.)	(run by the people)

You don't need to change your life or day-to-day routine, but by registering under common law and establishing yourself as a living man/woman, it protects you from their system

By establishing yourself under common law, you are protecting yourself from harm, loss, and injury, as well as people must deal with you honorably in contractual dealings

All you are doing is making a public declaration by registering your birth certificate
Further protect yourself by claiming ownership of your legal fiction

Social Services <u>is</u> a corporation
