

Knowledge Test

Purpose of Knowledge Test

A knowledge test is a set of questions or a series of tasks that candidates answer orally or in writing. Testing is conducted for a variety of purposes –

- find out what the candidate has learned
- determine the candidates' strengths and weaknesses in regards to the knowledge that underpins competent performance

Testing is one method of gathering evidence about the candidate's understanding of the knowledge that underpins competent performance. Needs to

Identifying the Knowledge that underpins competent

performance
Test must focus on the knowledge specified in the relevant unit of competency

Required information:

- ✦ key areas of knowledge required for competent performance
- ✦ depth and breadth of knowledge

In gathering this information the assessor needs to read the entire unit and pay particular attention to the list of underpinning knowledge specified in the Evidence Guide

**THANK YOU
VERY MUCH !!! AND
GOOD DAY !!**
