All organisms are capable of ___ stimuli

automatic responses

A___ is a simple , inborn, automatic response to a stimulus by a part of an organism

Reflex

This applies when the patient is seriously ill or being treated on an emergency basis in a state of relative helplessness because of a severe injury or lack of consciousness.

Active-passivity

Patient idealizes the doctor, taking form in transference.

The Seductive Patient

___this refers to a state of being aware of a stimulus or event

Conscious

_ defined Illness as the experience of suffering and discomfort, which may or may not be related to objective physical pathology.

Bishop (1994)

This theory is based on the assumption that most human behaviour is under voluntary control and hence is largely guided by intention.

Theory of Reasoned Action

__ are those that occur across the whole spectrum of illnesses.

Chronic Illness

The term behaviour generally refers to actions or reactions of an organism in response to__,

Stimuli

EHS409 TMA2

What \'manholes\' are to conventional sewerage, …… are to simplified sewerage.

Inspection cleanouts

Sterilization of waste water is achieved through the use of ultra-violet (UV) radiation. The following is not true of UV radiation.

===It removes chlorine and chloromine species from water.

Which is not a term commonly associated with contents of sewage

===Alkaline water

The layout of sewerage pipes would normally run parallel to streets. However, in some cases in simplified sewerage, pipe layout passes through property lots. This is referred to as:

===Condominium sewerage

Which analytical method is most recommended when the waste water is from commercial, industrial and municipal ventures, and is suspected to contain compounds toxic to biological life.

===Chemical oxygen demand (COD)

Waste water from food establishments is particularly difficult to manage owing to:

===Its high content in fats, oils and greese (FOG).

One of the following is not true of activated carbon.

===It is not effective at removing chlorine, sediment, and volatile organic compounds

Settled sewerage system is designed to assist:

===Septic tanks

Ultra filtration is one of four advanced waster water treatment process. Ultra filtration is also applied in the following areas, except.

===Ion exchange

The following non-sewage sources of waste water are not contaminated and do not require treatment, except:

===High efficiency furnaces

c.
“trajectory of social evolution”

d.
“evolutionary psychology.”

Which thought tends to cause progressive change in economic history?

a.
Ideological thoughts

b.
Realistic thoughts...answer

c.
Practical thoughts

d.
Theoretical thoughts

Individuals are considered to have some degree of control over their choices and actions within any social setting. What is this called?

a.
Norms

b.
Actors

c.
Roles

d.
Agency...answer

In the terms sociologists often use, population biologists have the means to make the _____ problem

a.
micro-macro

b.
maximum-minimum

c.
minimum-maximum

d.
macro-micro..answer

Who are the individuals who make up any social situation?

a.
Teachers

b.
Students

c.
Actors...answer

d.
Pastors

In order to facilitate the study of this sociology of knowledge, Karl Mannheim has identified three types of thought. Which of the following is not one of them?

a.
Ideological thoughts

b.
Theoretical thoughts..answer

c.
Practical thoughts

d.
Utopian thoughts

What does the sociology of knowledge refers to?

a.
The study of the relationships between systems of ideas and education

b.
The study of the relationships between systems of ideas and culture

c.
The study of the relationships between systems of ideas and beliefs..answer

d.
The study of the relationships between systems of ideas and religions

Who argued that “The proper theme of our study is to observe how and in what form intellectual life at a given historical moment is related to the existing social and political forces.?”

a.
Mannheim..answer

b.
Dahke

c.
Becker

d.
Wilson

Social environments cannot include one of the followings

a.

Social institutions

b.
social groups

c.
Social knowledge...answer

d.
Social hierarchies

What are the set of goals, behaviours and norms that actors within certain situations are expected to fulfill?

a.
Roles..answer

b.
Rules

c.
Rulers

d.
Rights

Nigerian people culture portrays
Chief Sony

1 When did Dr Michael Okpara establish ENTV

1960

2 The first television station in Lagos was

Nigeria Television Service (NTS)

3 The first private TV station in Lagos, AIT was owned by

Raymond Dokpesi

4 Where did Nigerian media get news materials before the establishement of NAN

Reuters

5 In which year was News Agency of Nigeria (NAN) founded

1976

6 Radio came to Nigeria through a process called

Radio Distribution Service

7 Who was the publisher of Nigerian Concord

Chief MKO Abiola

8 In the newspaper industry, what is the meaning of ABC?

Audit Bureau of Circulation

9 Who established the Post Express newspaper

Chief Sony Odogwu

10 Trough the Guardian, _____ championed the cause of democracy and human rights in Nigeria

Alex Ibru

11 Who was the author of My Odyssey?

Nnamdi Azikiwe

12 The Pilot contributed these to the growth of the Nigerian press except

the press as a tool of disintegration

13 The political organisation under which Pilot flourished was

Nigerian Youth Movement

14 West African Pilot was extablished in

1937

15 One of these was not among the Zik's attributes, which was manifested in the West African Pilot

tribalistic tendency

16 One papper was described as the focal point of nationalist consciousness. Which is it?

West African Pilot

17 Iwe Irohin was eStablished in

1859

18 One of these is a merit of mass media

economic empowerment

19 These are examples of international media, except

NYA Channels

20 Under which mass media system is it controlled on behalf of an incapable people?

authoritarianism

21 The first TV station to transmit in colour was _____

Benue-Plateau TV

22 What is the motive of Western Region Government for establishing WNTV

education

23 Majority of the early newspapers in Nigeria tremendously assisted in the cause of_____

nationalism

24 Which newspaper was taken over in 1975 by the Federal Government alongside Daily Times

New Nigerian Newspaper

25 The level of its foreign investment made _____ one of the best funded newpapers

Nigerian Daily Times

26 _____ excell above others as a journalist, politician and publisher

Nnamdi Azikiwe

27 Which one of the early newspaper publisher was named after a pioneer department of Mass
Communication in one of the Nigerian formost universities

John Payne Jackson

28 One of the trainee, who benefited from Campbell was

Richard Blaize

29 Some of the towns, which benefited from the Radio Distribution Service (RDS) included the following
except

Ogoja

30 The face pof wired wireless or wired radio in Nigeria ended in

1950

31 In Nigeria, radio started with the relay of BBC programmes in Lagos in

1932

32 With whom is Satellite associated

Jim Nwobodo

33 which one does not belong to this group

Daily Times

34 Which newspaper has "Conscious nurtured by Truth" as its motto

The Guardian

35 One of these factors did not contribute to the growth of the Nigerian press

humanitarian

36 One of these is not among Anglo-African's contribution to Nigerian press

entrenched newspaper as a means of rural mobilisation

37 Among the characteristics of Anglo-African was

it was the second newspaper in Nigeria

38 Robert Campbell was all these except

psychologist

39 Iwe Irohin waterloo was

the Ifole uprising between Ibadan and Egba traders

40 these are some of features of Iwe Irohin except

adopted only horizontal make-up

1. Let the alphabet Σ be the standard 26 letters {a,b,...,y,z}. If A = {good,bad} and B ={boy,girl}, then AUB is____.

a) {good,bad,boy,girl}✅✅
b) {ϵ,good,bad,goodboy,badgirl}
c) {goodboy,badgirl}
d) {boy,girl}
2. _____ is a finite non-empty set of indivisible symbols.

a) alphabets
b) language
c) vocabulary✅✅
d) word
3. In a nondeterministic machine ____, choices may exist for the next state at any point.

a) three
b) one
c) two
d) several✅✅
4. Consider the grammar G where N = {S,B}, Σ = {a,b,c}, S is the start symbol and P consists of the following production rules: 1. S-->aBSc; 2. S --> abc; 3. Ba --> aB; 4. Bb --> bb. The grammar defines the language___.

a) L(G) = {a0bncn| n ≥ 0
b) L(G) = {anbncn| n ≥ 0✅✅
c) AL(G) = {anbn-1c| n ≥ 0
d) L(G) = {anbn-1cn-1| n ≥ 0
5. Type 2 of the Chomsky hierarchy denotes____.

a) unrestricted languages
b) regular language
c) context- sensitive language
d) context-free language✅✅
6. A formal language can be given as the following EXCEPT:

a) strings generated by some formal grammar.
b) strings described by a particular regular expression.

c) strings generated by a compiler.✅✅
d) strings accepted by some automation.
7. The set of all words over an alphabet Σ is usually denoted by ____.

a) Σ0
b) Σ+
c) Σ*✅✅
d) Σu
8. Typical questions asked about a formal language the following EXCEPT:

a) what is their expressive power?
b) what is their comparability?
c) what is their understandability?✅✅
d) what is their recognizability?
9. Every state of a Deterministic Finite Automata has exactly _ existing transition arrow for each symbol in the alphabet.

a) several
b) two
c) one✅✅
d) three
10. A formal language is a set of _.

a) words✅✅
b) alphabets
c) numbers
d) syntaxes

Turn headings and sub-headings into questions

Summarising concepts on note cards

Maintain logical conclusion

Phonemics

Note making

value judgement

A Verbal learner is also referred to as _

Reading and writing

What is current number of approved dual mode institutions?

20

Your reading will be more memorable if you ___ along the reading

question

To formulate questions that will guide your reading the following should be considered EXCEPT

length of the material for reasonable manner

The process of making a value judgement about the worth of a student's performance is referred to as ____

Evaluation

The preferable time for any students to ask question during teaching /interaction is

When the teaching has ended

Advantages of Learning through reading include vocabulary expansion, improved language skills and ____

exploration of new ideas

The four basic of writing are Descriptive, Narrative, Argumentative and __

Expository

The second mode of open and distance learning in Nigeria is known to be

Correspondence and Open Studies Institute

The essay that tell a story is called __

Narrative Essay

The full meaning of SMART is _

Specific, Measurable, Attainable, Relevant and Timely

The following are considered appropriate for an instructors to ensure that their methods of assessment are effective

maintain logical conclusion

A compromise in the mental/physical state of an individual implies

Physiological Barriers

____ refers to the confirmation of certain characteristics of an object, person, or organization

Certification

What you do first before reading a book is ___

Survey

In what chapter of a project write up can Research Design be found?

Chapter Three

___ is the feedback from the student to the instructor about the student's learning

Assessment

The scope of evaluation involves

value judgement

Which of these is NOT a technique for effective study?

Divulging information

Which of the following requires persuasiveness and validity?

Argumentative Essay

The first support service of the university that response to students' issues is____
ans:Faculties and Departments
One of these is an individual study activity

ans:Note Making
SQ3R is an acronym for the five stages of ___
ans:reading process
Which of these examinations did not hold at the study centres?
ans:computer marked
___ refers to as ability to recognize and use individual sounds to create words
ans:Phonemics
All students in online learning environments must possess the following EXCEPT
ans:self-expression
In project writing, what chapter do you appraise your work
ans:chapter two
The type of listening that is marked by the intention to learn is known as
ans:Attentive listening
The second step in a good writing process is ____
ans:to collect materials
When checking for words, sentences, paragraphs and illustrations that are irrelevant in writing process is referred to as ____
ans:Editting

Advantages of Interviewer administered questionnaire include the following except_____

CONVENIENT FOR THE RESEARCHER

Infantometer is used to measure_____

CHILDREN LESSTHAN 2 YEARS

A screening test that detects a negative result is called_____

SPECIFICITY (negative result)

The main reason for the preparation of a frequency table is to _____

COMPRESS THE SIZE OF Data

Vital Marriage statistics covers _____except

DOMESTIC VIOLENCE

In a screening test, specificity is _____

TN/TN+FP (spec)

In a screening test, sensitivity is _____

TP/TP+FN (sens)

Ability of a test result to be reproduced consistently is called _____

RELIABILITY

A single observation consisting of numerical information is called_____

DATUM

The bar chart is commonly represented in three forms except _____

CONVOLUTED BAR CHART

PHY192 8/10

Concave – shaking mirror

Real – image inverted with object

Virtual – image not seen

Series – electric current

Convex – view mirror motorcycle

Reflection – screw appears bent

Series – equivalent resistance

41.8

Real – image only

Refraction – ending of a ray of light

CSS133 TMA2 9/10

Persons who have been tried and convicted for particular offences by courts of competent jurisdiction are called criminal by_____

adjudication

Deviance is a violation of the norms held by the society's members while crime is a_____form of deviance

particular

Deviance is a violation of norms of the land,-a deviation from or failure to_____to the norm

conform

_____ addicts and narcotics are interpreted as crime against the public order

drug

Anyone who violates the criminal law should be deemed a criminal, regardless of whether or not they are_____, tried, and punished by a court of law_

apprehended

The_____should be understood as a person who has violated the criminal law of the land and has been found guilty by a court of law and puni

criminal

Mores are norms which are generally regarded as_____and the violation is severly strongly sanctione

extremely important

Mores generally include behaviours_____ as those that absolutely “must” or “must not” occur

defined

To _____ , mores are society’s standard of proper moral conduct_

William Graham Summer

The principal characteristics are that folkways are fairly weak norms sometimes called_____which are passed down from the past

conventions”

PHY101

A machine part consists of three heavy disks linked by struts of negligible weights as shown in the figure. Calculate the moment of inertia of the body about an axis through the centre of disk A and the kinetic energy, if the body rotates about an axis through A perpendicular to the plane of the diagram, with angular speed $\omega {=} 6.0$ rad/s.
(A) $0.132kgm^{2}$, 2.376 J

A satellite moves in a circular orbit around the earth with speed v = 6000 m/s. Determine the satellite's altitude above the earth's surface and the period of the satellite's orbit. The earthâ€™s mass and radius are $M = 5.97\times{10^{24}} kg$ and $R = 6.378 \times{10^{6}} m$.
(D) $4.69\times{10^{6}} m$, 3.22 hrs.

An object of mass 2 kg moving with velocity of 12 m/s, collides head-on with a stationary object whose mass is 6 kg. Given that the collision is elastic, what are the final velocities of the two objects? Neglect friction.
(C) $6ms^{-1}$, $-6 ms^{-1}$

Suppose a nitrogen molecule at the surface of the earth happens to have the root mean square velocity for that gas at exactly $0^{o}C$. If the molecule were to go straight up without colliding with any other molecules, how high would it rise? Take $g= 9.81m/s^{2}$; mass of the nitrogen molecule is $4.65\times{10 }^{-26} kg$ and Boltzmann constant is $1.38\times{10 }^{-23} $ J/K
(C) 12.4 km

A certain hydraulic jack is used for lifting loads. A force of 250 N is applied on the small piston with a diameter of 80 cm while the diameter of the large piston is 2.0 m. The applied force moves through a distance of 25 cm. Calculate the maximum mass of a load that can be lifted by the jack and the distance through which the load is lifted. Take $g=9.81 ms^{-2}$
(C) 159.3 kg, 4.0 cm

A uniform ladder of mass m = 40 kg and length l = 10 m is leaned against a smooth vertical wall. A person of mass M = 80 kg stands on the ladder a distance x = 7 m from the bottom, as measured along the ladder. The foot of the ladder is d = 1.2 m from the bottom of the wall. What are the force exerted by the wall and the normal reaction exerted by the floor on the ladder?
(B) 90.1 N, 1177.2 N

The piston in a certain engine executes simple harmonic motion. Given that the maximum displacement of the piston from its centre-line is $\pm{7}$ cm and that the mass of the piston is 4 kg, and the maximum frequency of the piston when the engine is running at 4000 rev/min, calculate the maximum velocity and the maximum acceleration?
(A) 29.32 m/s; $1.228\times{10^{4}}m/s^{2}$

A metal wire 75.0 cm long and 0.130 cm in diameter stretches 0.0350 cm when a load of 8.00 kg is hung on its end. Find the $Young^{'}s$ modulus for the material of the wire.
(B) $1.27\times{10^{11}} Pa$

What is the net upward force on an airplane wing of area $20 m^2$ if the speed of airflow is 300 m/s across the top of the

wing and 280 m/s across the bottom? Density of air is $1.29 kgm^{-3}$.
(A) $1.5\times{10^5} N$

In a system shown in the figure, the gas in the cylinder is at a pressure of 8000 Pa and the piston has an area of $0.1 m^{2}$. As heat is slowly added to the gas, the piston is pushed outward a distance of 4 cm. If 42 J of heat is added during the expansion, calculate the change in internal energy of the system, assuming that pressure remains constant during the process.
(D) 10 J

A body of mass m is pulled along a smooth horizontal surface by a force P inclined at an angle θ above the horizontal. If the body starts from rest, which of the following correctly gives the distance it moves in a time t?
(A) $\frac{Pt^2cos{\theta}}{2m}$

Calculate the root mean square velocity of a nitrogen gas molecule moving in air at $27^{o}C$. Atomic mass of nitrogen is 14 kg/mol; Avogadro constant is $6.02\times{10^{-26}}kmol^{-1}$n and Boltzmann constant is \1.38\times{10^{-23}J/K}\
(A) 520 m/s

Sand drops from a stationary hopper at the rate of 0.5 kg/s onto a conveyor belt moving with a velocity of 12 m/s. Calculate the force required to maintain motion of the belt at this velocity.
(C) 6.0 N

A solar collector is thermally insulated so that conduction is negligible in comparison with radiation. On a cold but sunny day the temperature outside is $-20^{o}C$ and the sun irradiates the collector with a power per unit area of $300 W/m^{2}$. Treating the collector as a blackbody (emissivity = 1), determine its interior temperature after the collector has achieved a steady-state condition (radiating energy as fast as it is received).
(A) 38^{o}

A cube of wood 5.0 cm on each edge floats in water with $\frac{3}{4}$ of the wood submerged. What is the weight of the cube?
(B) 0.92 N

Which of the following correctly gives the absolute pressure at an ocean depth of 1000 m? Take the density of ocean water as \(10^{^{3}}kg/m^{3}\) and atmospheric pressure as \(1.01\times{10^{5}Pa}\)
(B) \(9.9\times{10^{6}}Pa\)

At what initial speed must a 2.00-metre-tall basketball player throw the ball if the ball must go through the hoop without hitting the backboard, given that he throws the ball at \(45^{o}\) to the horizontal, 10 m from the post and the basket is 3.05 m high as shown in the figure?
(A) 10.46 m/s

Calculate the coordinates of the centre of mass of three particles of masses \(m_{1}=1.0 kg\), \(m_{2}=2.0 kg\) and \(m_{3}=3.0 kg\) at the corners of an equilateral triangle 1.0 m on each side, such that the coordinates of \(m_{1}\), \(m_{2}\) and \(m_{3}\) are (0,0), (0,1) and \(\left (\frac{1}{2},\frac{\sqrt{3}}{2}\right)\) respectively in the cartesian coordinate system.
(C) \(\left (\frac{7}{12}, \frac{\sqrt{3}}{4}\right)\) m

Given that \(\vec{a}=3\hat{i}-2\hat{j}-\hat{k}\) and \(\vec{b}=\hat{i}+4\hat{j}+2\hat{k}\) find \(\left (\vec{a}\times\vec{b} \right)\)
(D) \(\left (\vec{a}\times\vec{b} \right)=-7\hat{j}+14\hat{k}\), \(\hat{n}=-\frac{1}{\sqrt{6}}\hat{j}+\frac{2}{\sqrt{6}}\hat{k}\)

Which of the following physical principles correctly explains the control of the spread of covid-19 pandemic through wearing of face-mask?
(C) surface tension

In a system shown in the figure, the gas in the cylinder is at a pressure of 8000 Pa and the piston has an area of \(0.1 m^{2}\). As heat is slowly added to the gas, the piston is pushed outward a distance of 4 cm. If 42 J of heat is added during the expansion, calculate the change in internal energy of the system, assuming that pressure remains constant during the process.
(D) 10 J

PHS819 TMA2

which of the following is the very effective method of health education to bring about change in health behaviour of people?
ans:Group discussion
What is distortion of information?
ans:All of above
Health promotion is defined as ‘the process of enabling people to increase control over, and to improve, their health by “
ans:World health organization
Health promotion can refer to any event, process or activity that facilitates the protection or improvement of the
ans:all of these
The following is a scope of health promotion EXCEPT
ans:none of these
The introduction of things like electricity, airplane, television to health education etc is
ans:Exploration
Which of the following is not a key element of communication?
ans:Flash card
The health promotion approach that relies heavily upon the provision of information about risks and benefits of certain behaviours.
ans:behaviour change approach
Which of the following is the objective of health education?
ans:Evaluation motivation and implementation
Which is the best way of changing the behaviour?
ans:Enforcement

GST807 TMA2 8/10
The following are ways to develop fluency EXCEPT
ans:full and rich understanding
Reading for pleasure involves
ans:leisure and independence
The third chapter in most research project report is
ans:Methodology
The distinctive feature of a language construction is
ans:grammar
How many individual units of sound has the world 'mop'?
ans:3
What involves conveying information or expressing feelings to listeners using vocals?
ans:vocabulary
Exploration of new ideas in learning through reading involves
ans:creating new perspectives on a concept
The mode of note taking that is drawn up based on two unequal columns is referred to as

ans:Cornell
The assessment that makes learners to diagnose the problem they encounter during learning process is
ans:assessment for learning
Which of these is NOT true of skimming?
ans:retrieving information that is relevant to a purpose

GST 807 2021_2 TMA1 10/10

1. In other to make Tabitha Intrinsically Motivated, she must

Ans. Connect with other classmates

2. Self-behaviors to be possessed by open and distance learning students are as follows Except

Ans. Studying

3. What is the result of peripheral participation in collaborative discussion?

Ans. Not allowing for active mastery of concepts

4. When the job of a teacher is no longer the dispenser of knowledge to ensure student-centredness, he therefore serve as a

Ans. Facilitator

5. Which of the following does not show empathy to the speaker?

Ans. Jumping in when the speaker is talking

6. How could ODL student’s isolation problem be reduced to bearest minimum?

Ans. Creating learning network

7. What do you refer to as physical location, contexts, culture and software that facilitate learning?

Ans. Learning Environment

8. The age range of most Open and Distance Learning Students in India is

Ans. 21-40 years

9. Who postulated that the emergence of the increasingly student-centred learning activities is facilitated by new instructional technology?

Ans. Beandoin

10. The most Basic level of the use of ear is?

Ans. Hearing

The mucosal layer of the ureter consists of all EXCEPT

muscularis mucosae

All are true of the ureters, EXCEPT

convey urine from the kidneys to the urterine bladder

The wall of the ureter is composed of the following, EXCEPT

an outer mucosal layer

The ureter in both sexes runs anterior to the followings EXCEPT

medial wall of the lesser pelvis

All are true in females the ureter courses, EXCEPT

anterior to the ovary

The innervations of the ureters are

autonomic having sympathetic and parasympathetic contributions

All are true in males the ureter courses, EXCEPT

internal urethra sphincter

_____ is not part of ureteric branches of the renal arteries

pelvic aorta

Each ureter measures _____ in length and comprise the renal pelvis, abdominal, pelvic and intravesical portions

25cm

The ureters each comprise the _____ portions, EXCEPT

Interthoraxic

NSC221 TMA2 9/10

The two types of endocytosis are

phagocytosis and pinocytosis

Carrier proteins are needed in

Facilitated diffusion

Major examples of fibrous proteins are

Collagen and Keratin

The structure of mitochondria include the following except

Outer membrane with lipid

The body maintains conditions within particular limits by

Negative feedback

The characteristics of monosaccharide include the following except

Glycosidic bond

Homeostatic mechanisms are maintained by

All organs

Dendrites of nerve fibers

transmits graded electrochemical impulses to the cell body

Oxytocin stimulates the uterus to contract is example of

Positive feedback

The functions of the cell membrane protein are the following except

None of the above

NSC215 TMA2 10/10

One of these drugs is used to prevent the rejection of transplanted organs.

Cyclosporine

The ilium and spine protect the ____ system

Rogenital

The first vaccine was produced by who?

Edward Jenner

One of the following is not a type of suture joint?

Dentate suture

The patella protects what?

The knee

Defence protein produced by body cells that are infected by virus is what?

Interferons

An articulating surface which is smaller and concave in all direction is called

Female surface

Most bones of the skull of what type of bone?

Flat bone

What is the non-invasive method for examining deep structures called?

Anatomical imaging

The chemical in saliva that kills micro organism is called

Lysozyme

NSC223 9/10

The following are examples of branched chain amino acids except

Cycteine

A typical example of a polyprotic acid is

H2SO4

Which of the following is an example of essential amino acids

Tryptophan

When a little amount of H+ ion is added to a buffer solution,

The equilibrium shift to the left

The buffer of the extracellular fluid is

bicarbonate buffer

What is the H+ ion concentration of 0.001 M HCl?

0.001 mole

The transportation of lipids in the blood is carried out by

Lipoproteins

The following are ketogenic amino acids except

Serine

A typical example with an acid with many ionization points is

HCl

The buffer of the intracellular fluid is

Phosphate

Social Contract Theory

Planning economic development of the country

Sovereignty

None of the above

Right to freedom of discrimination

Citizen

Coercion

Tangibility

Classical type of sovereignty

Confederal constitution

POL111 TMA2 9/10

Indicate which is not a supreme power of the state over her citizens and subjects, and in itself not bound by the laws?

Sovereignty

Citizens have diverse human rights, except

Right to freedom of discrimination

A person entitled to full political and legal rights in a state is known as a

Citizen

In Adams Smith’s Wealth of Nation, he averred that one of these elements does not constitute the duty of the state?

Planning economic development of the country

The tenets of a modern state as described by all these, except?

Social quagmire

States evolved from citizens surrendering their rights to rule themselves to the constituted authority is the scholarly contribution of?

Social Contract Theory

Authority infers voluntary acceptance and submission to control, while power involves

Coercion

What will you call a constitution that allows states to retain sovereignty within a whole union?

Confederal constitution

The thin dividing line between legal sovereignty and political sovereignty is a

Classical type of sovereignty

Isolate the charasterictic that is not an element of state power

Tangibility

NSC219 10

____facilitates the developmet of new knowledge and modes of nursing practice

Research

Which of the following determines people\'s relationship with their physical and social surroundings?

Mental processes

For a nurse to be accountable, the nurse acts according to the

code of ethics

The quality or state of being self-governing is

Autonomy

The race for education for nurses started by Florence Nightingale in the .....

19th century

In Myra Levine theory, observation allows the nurse to

a & b

Nursing profession regulates accountability through the process of

a & c

According to Callista Roy, a person needs a nurse when

when an unusual stressors or weakened coping-mechanism make a person\'s usual attempts to cope ineffectively

A nurse theorist who indicated that nursing\'s special concern is man\'s need for the provision and management of self-care action on a continuum basis is

Dorathea Orem

A nurse is accountable to which of the following?

all of the options
