Do you know what helps you make your point clear?
Lists like this one:

And the most important thing: the audience won’t miss the point of your presentation

MAYBE YOU NEED TO DIVIDE THE CONTENT

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it’s only a bit larger than our Moon. The planet’s name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

VENUS

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It’s the second-brightest natural object in the night sky after the Moon

YOU COULD USE THREE COLUMNS, WHY NOT?

MARS

Despite being red, Mars is actually a cold place. It’s full of iron oxide dust, which gives the planet its reddish cast

JUPITER

It’s a gas giant and also the biggest planet in our Solar System. Jupiter is the fourth-brightest object in the sky
