Christmas infographics

Here's where your template begins

Christmas Infographics

Mars
Despite being red, Mars is a cold place. It’s full of iron oxide dust

Venus
Venus second planet from the Sun. It’s terribly hot—even hotter than Mercury

Mercury
Mercury is the closest planet to the Sun and the smallest of them all

Jupiter
It’s a gas giant and the biggest planet in the entire Solar System

Christmas Infographics

Mars

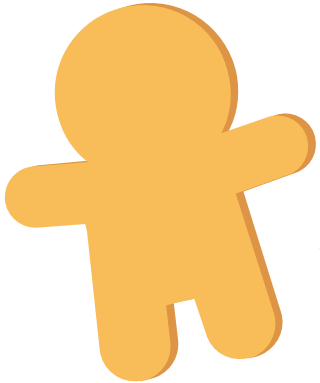

Despite being red, Mars is cold

30%

Mercury

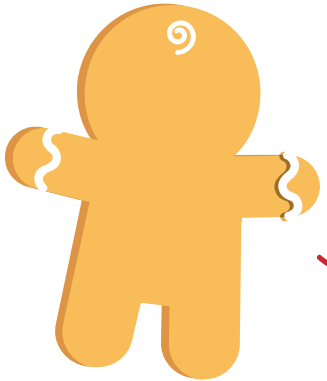

Mercury is the smallest planet

40%

Jupiter

Jupiter is the biggest planet

60%

Venus

Venus has a beautiful name

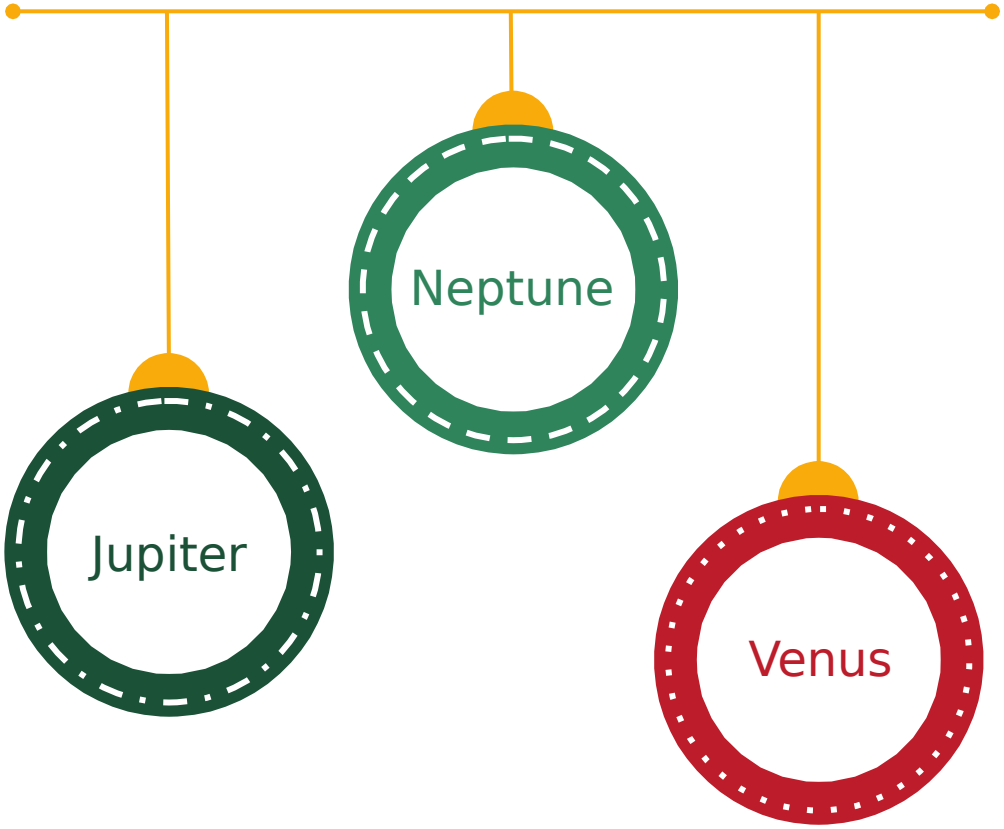

100%

Christmas Infographics

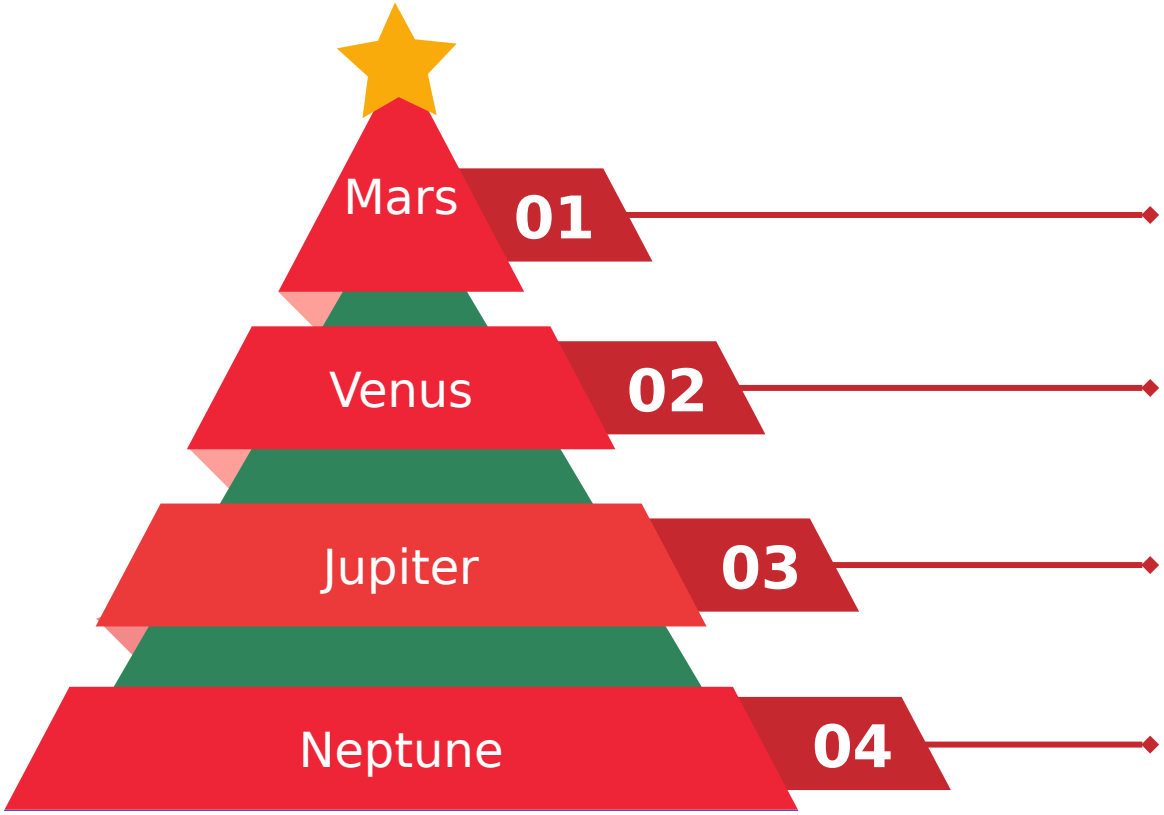

Jupiter is a gas giant and also the biggest planet in the entire Solar System

Neptune is the farthest planet from the Sun and the fourth-largest by diameter

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot

Christmas Infographics

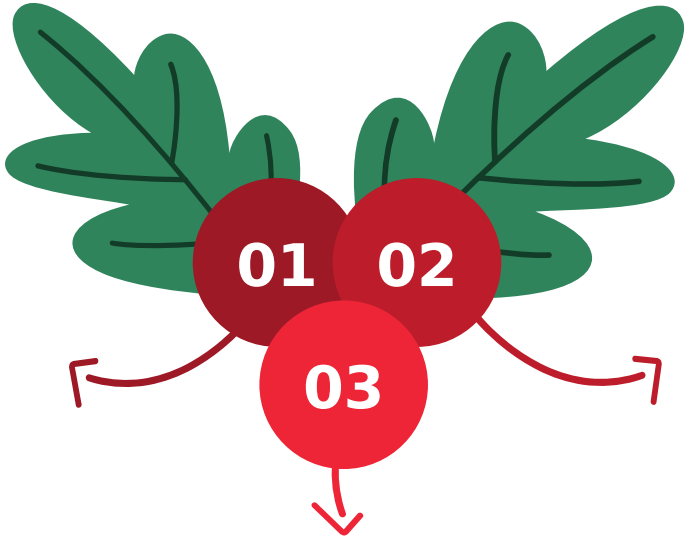

Despite being red, Mars is a cold place. It’s full of iron oxide dust

Venus has a beautiful name and is the second planet from the Sun

It’s a gas giant and the biggest planet in the Solar System

Neptune is the fourth-largest planet in the Solar System

Christmas Infographics

Venus

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury

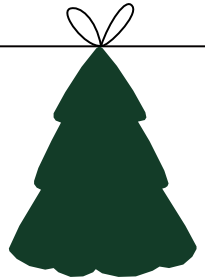

Jupiter

It’s a gas giant and the biggest planet in the Solar System. Jupiter is the fourth-brightest object

Mars

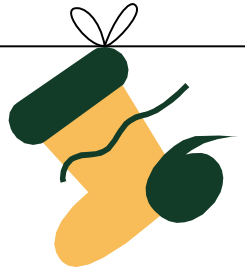

Despite being red, Mars is a cold place. It’s full of iron oxide dust, which gives the planet its reddish cast

Christmas Infographics

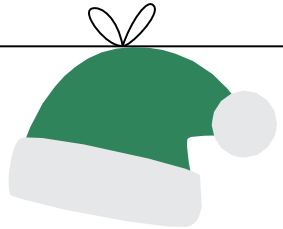

Venus

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot

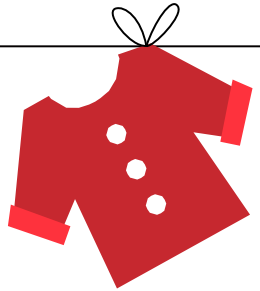

Mars

Despite being red, Mars is a cold place. It’s full of iron oxide dust, giving the planet its red cast

Jupiter

Jupiter is a gas giant and the biggest planet in the Solar System. It was named after a god

Mercury

Mercury is the closest planet to the Sun and the smallest one in the Solar System

Christmas Infographics

Saturn

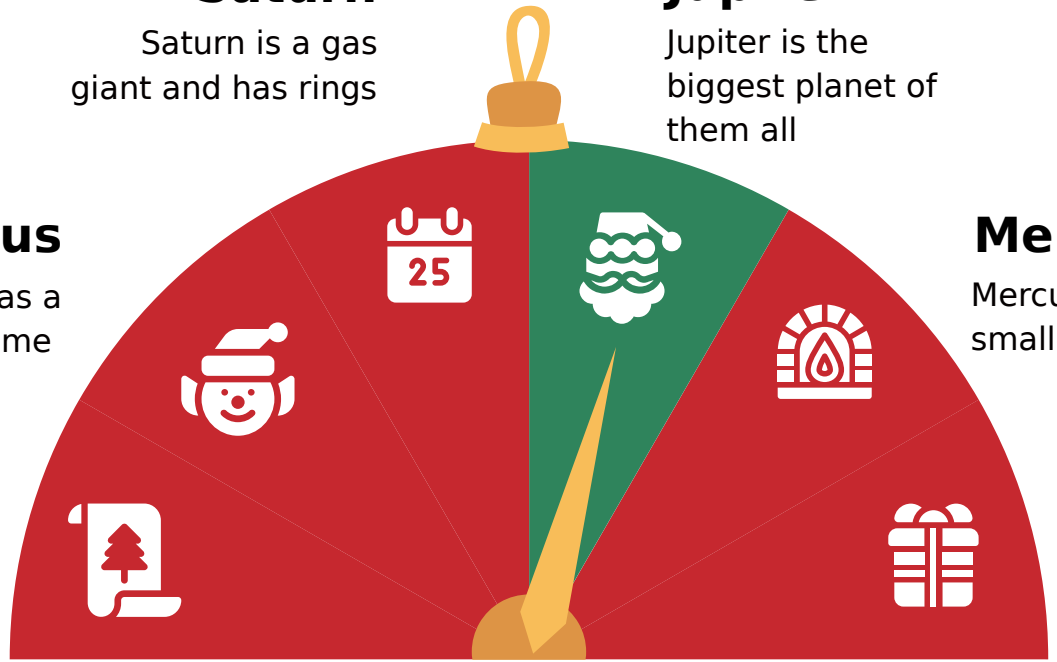

Saturn is a gas giant and has rings

Jupiter

Jupiter is the biggest planet of them all

Venus

Venus has a beautiful name

Mercury

Mercury is the smallest planet

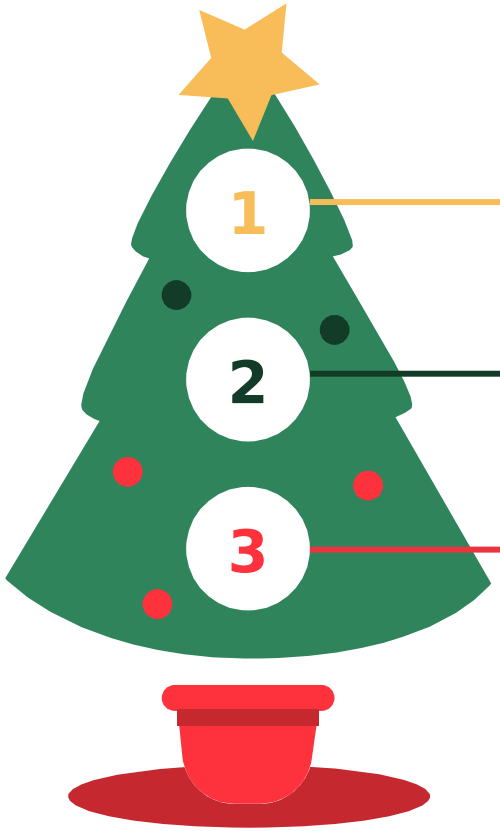

Mars

Despite being red, it’s a cold place

Neptune

It’s the farthest planet from the Sun

Christmas Infographics

Mars

Despite being red, Mars is a cold place. It’s full of iron oxide dust

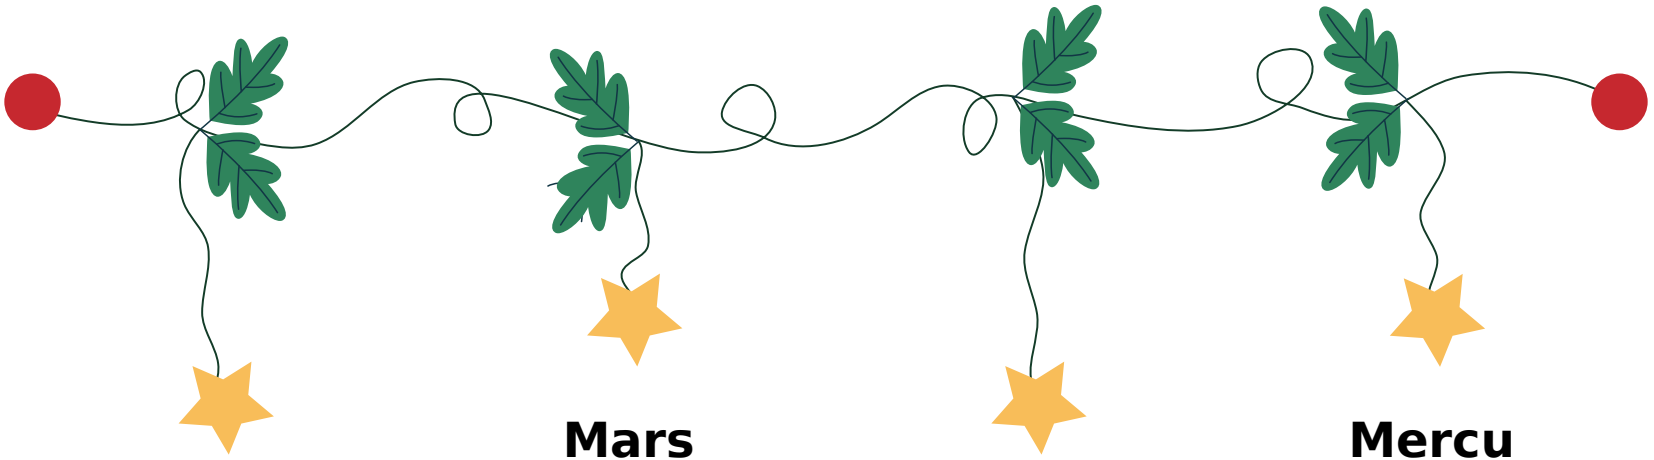

Venus

Venus second planet from the Sun. It’s terribly hot—even hotter than Mercury

Mercury

Mercury is the closest planet to the Sun and the smallest of them all

Christmas Infographics

Venus

Venus has a beautiful name and is hot

Mars

Despite being red, Mars is a cold place

Neptune

It’s the farthest planet from the Sun

Mercury

Mercury is the closest planet to the Sun

Christmas Infographics

01

Mars

Despite being red, Mars is cold

02

Mercury

Mercury is the smallest planet

03

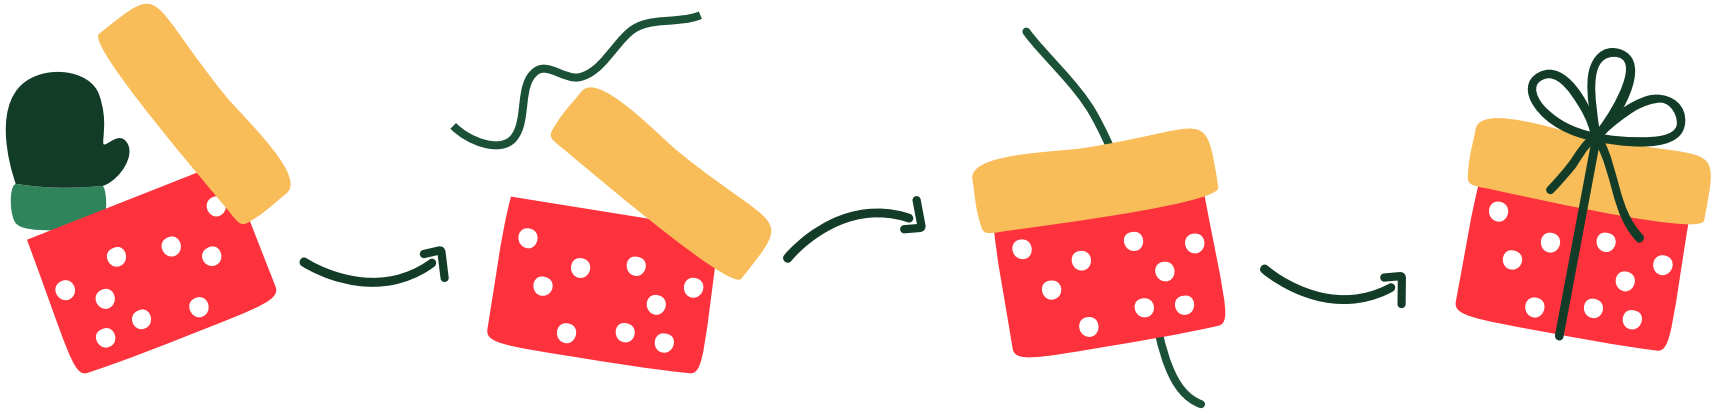

Jupiter

Jupiter is the biggest planet

04

Venus

Venus has a beautiful name

Christmas Infographics

Saturn
Saturn is a gas giant and has several rings

Mars
Despite being red, it’s actually a cold place

Neptune
Neptune is the farthest planet from the Sun

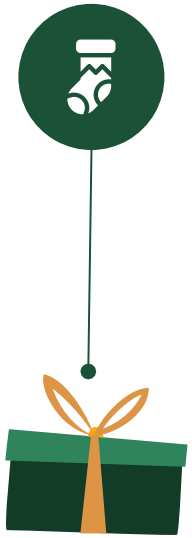

Jupiter
Jupiter is a gas giant and the biggest planet

Venus
Venus is the second planet from the Sun

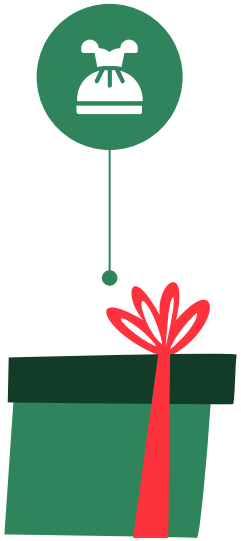

Mercury
Mercury is the closest planet to the Sun

Christmas Infographics

Venus

Venus has a beautiful name and is the second planet

Mars

Despite being red, Mars is actually a very cold place

Jupiter

It’s a gas giant and the biggest planet in the Solar System

Mercury

Mercury is the closest planet to the Sun and the smallest one

Christmas Infographics

Mars

Despite being red, Mars is actually a cold place. It’s full of iron oxide dust

Venus

Venus has a beautiful name and is the second planet. It’s terribly hot

Mercury

Mercury is the closest planet to the Sun and the smallest of them all

Christmas Infographics

Venus

It’s a beautiful name and is the second planet from the Sun. It’s terribly hot

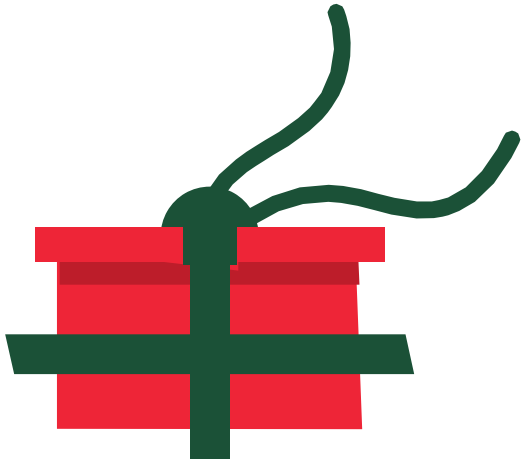

Mars

Despite being red, Mars is a cold place. It’s full of iron oxide dust

Neptune

It’s the farthest planet from the Sun and the fourth-largest

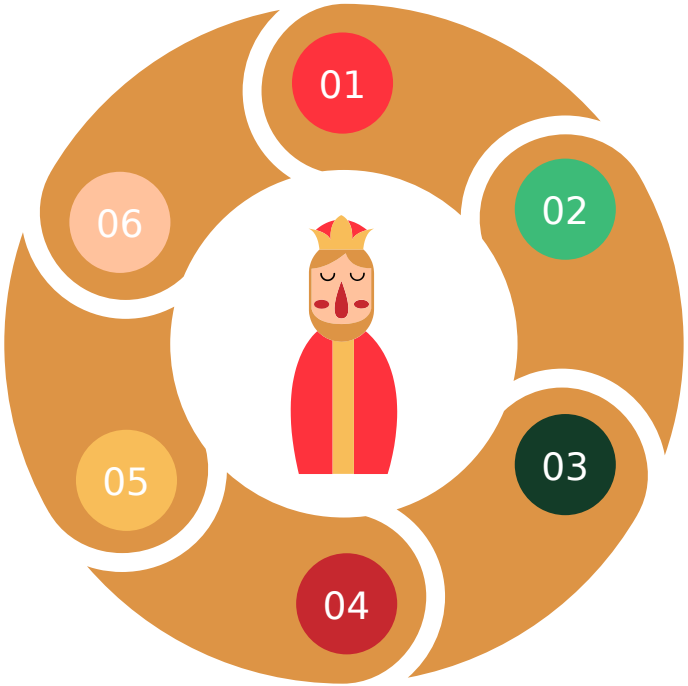

Christmas Infographics

Neptune
Neptune is the farthest planet from the Sun

Jupiter
Jupiter is a gas giant and the biggest planet

Earth
Earth is the third planet from the Sun

Venus
Venus has a beautiful name and is the second

Mars
Despite being red, Mars is a cold place

Saturn
Saturn is a gas giant and has several rings

Christmas Infographics

Mercury

Mercury is the closest planet to the Sun

Saturn

It’s composed of hydrogen and helium

Earth

Earth is the third planet from the Sun

Neptune

Neptune is the farthest planet from the Sun

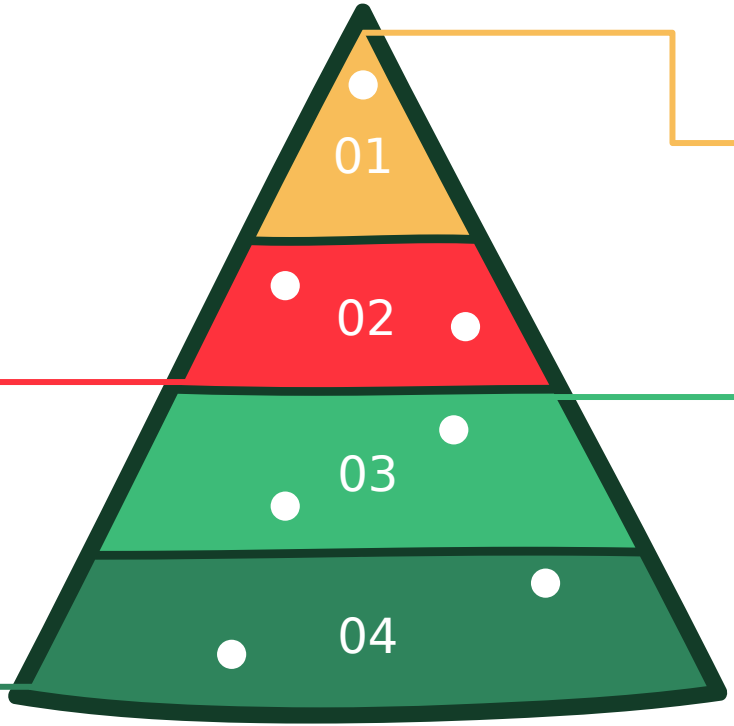

Christmas Infographics

Saturn

Saturn is composed mostly of hydrogen and also helium

Mercury

Mercury is the closest planet to the Sun and the smallest of them all

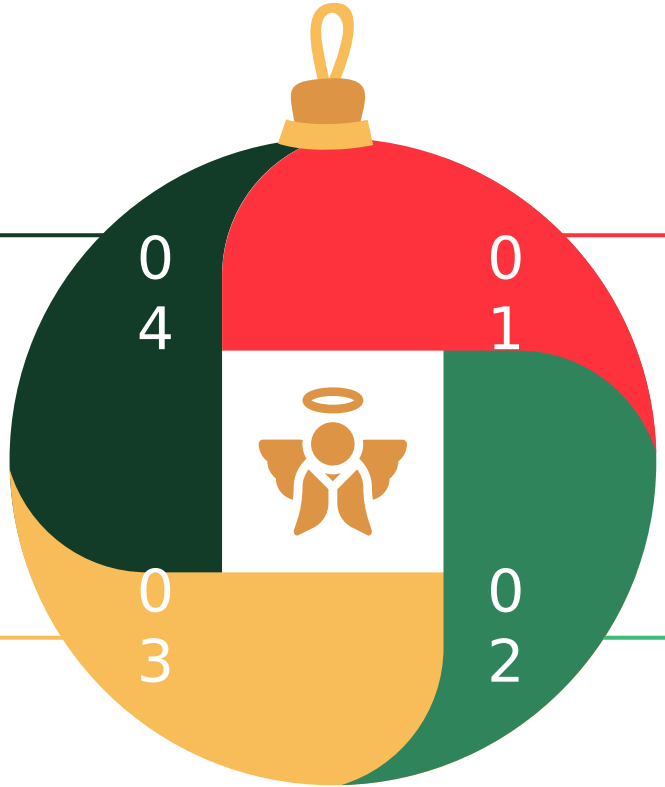

Venus

Venus has a beautiful name and is the second planet from the Sun

Neptune

Neptune is the farthest planet from the Sun and the fourth-largest

Christmas Infographics

Jupiter

Jupiter is a gas giant and the biggest planet

Mars

Despite being red, Mars is actually a cold place

Venus

Venus has a beautiful name and is the second planet

Saturn

Saturn is composed of hydrogen and helium

Christmas Infographics

Mars

Despite being red, Mars is actually a cold place. It’s full of iron oxide dust

Venus

Venus has a beautiful name and is the second planet. It’s terribly hot

Mercury

Mercury is the closest planet to the Sun and the smallest of them all

Christmas Infographics

Neptune

Neptune is the farthest planet from the Sun

Jupiter

Jupiter is a gas giant and the biggest planet

Earth

Earth is the third planet from the Sun

Venus

Venus has a beautiful name and is the second

Mars

Despite being red, Mars is a cold place

Saturn

Saturn is a gas giant and has several rings

Christmas Infographics

Jupiter

It's a gas giant and the biggest planet in the Solar System. Jupiter is the fourth-brightest object

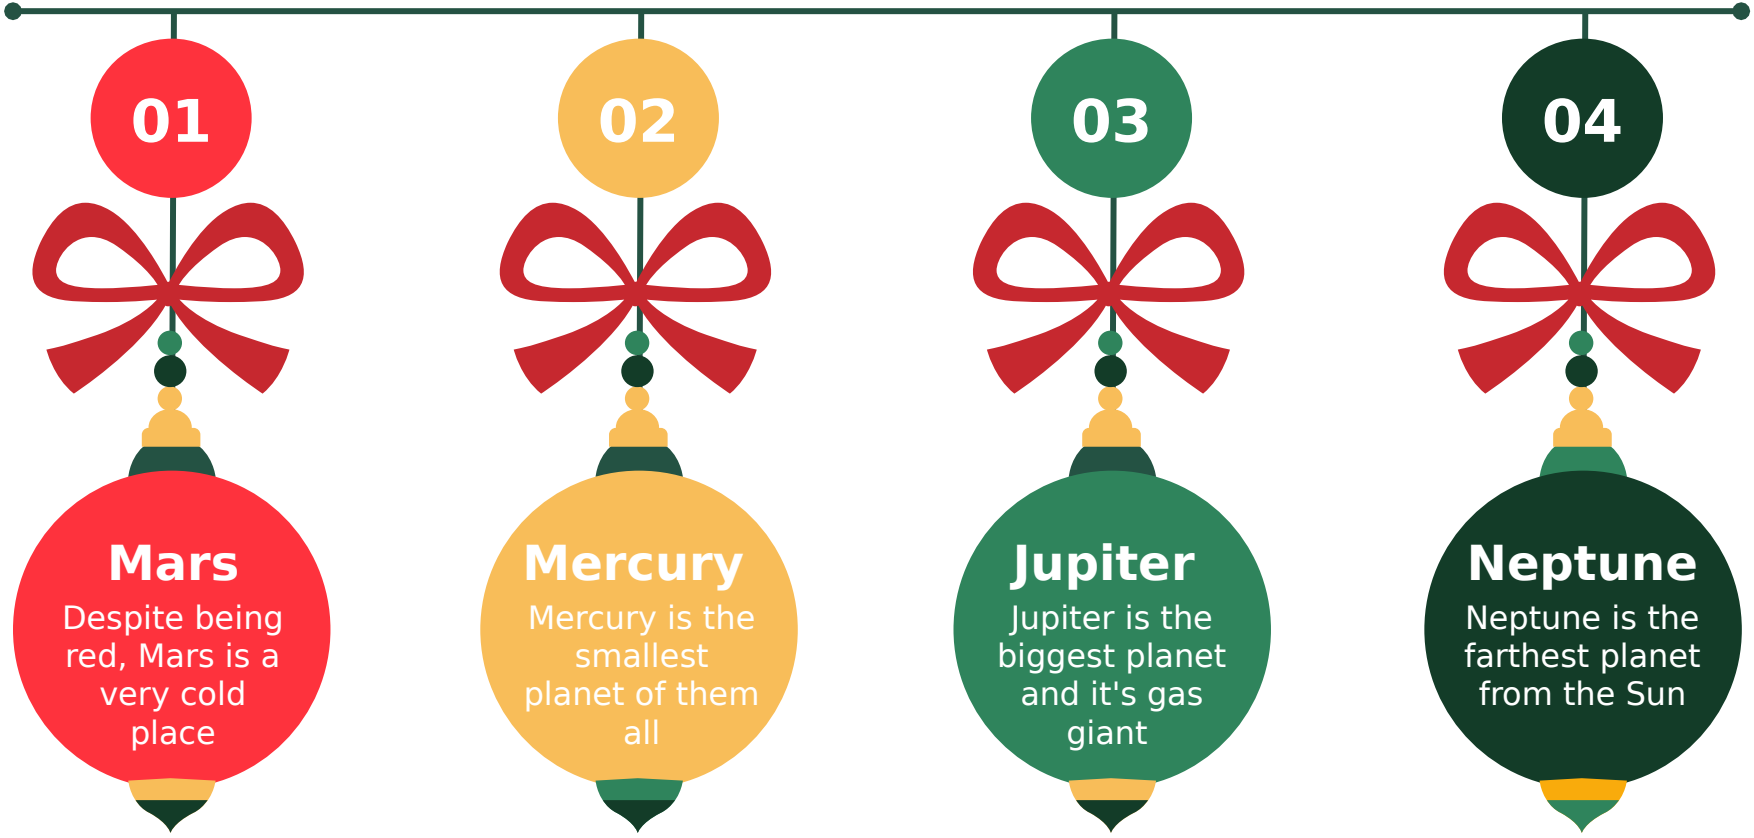

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury

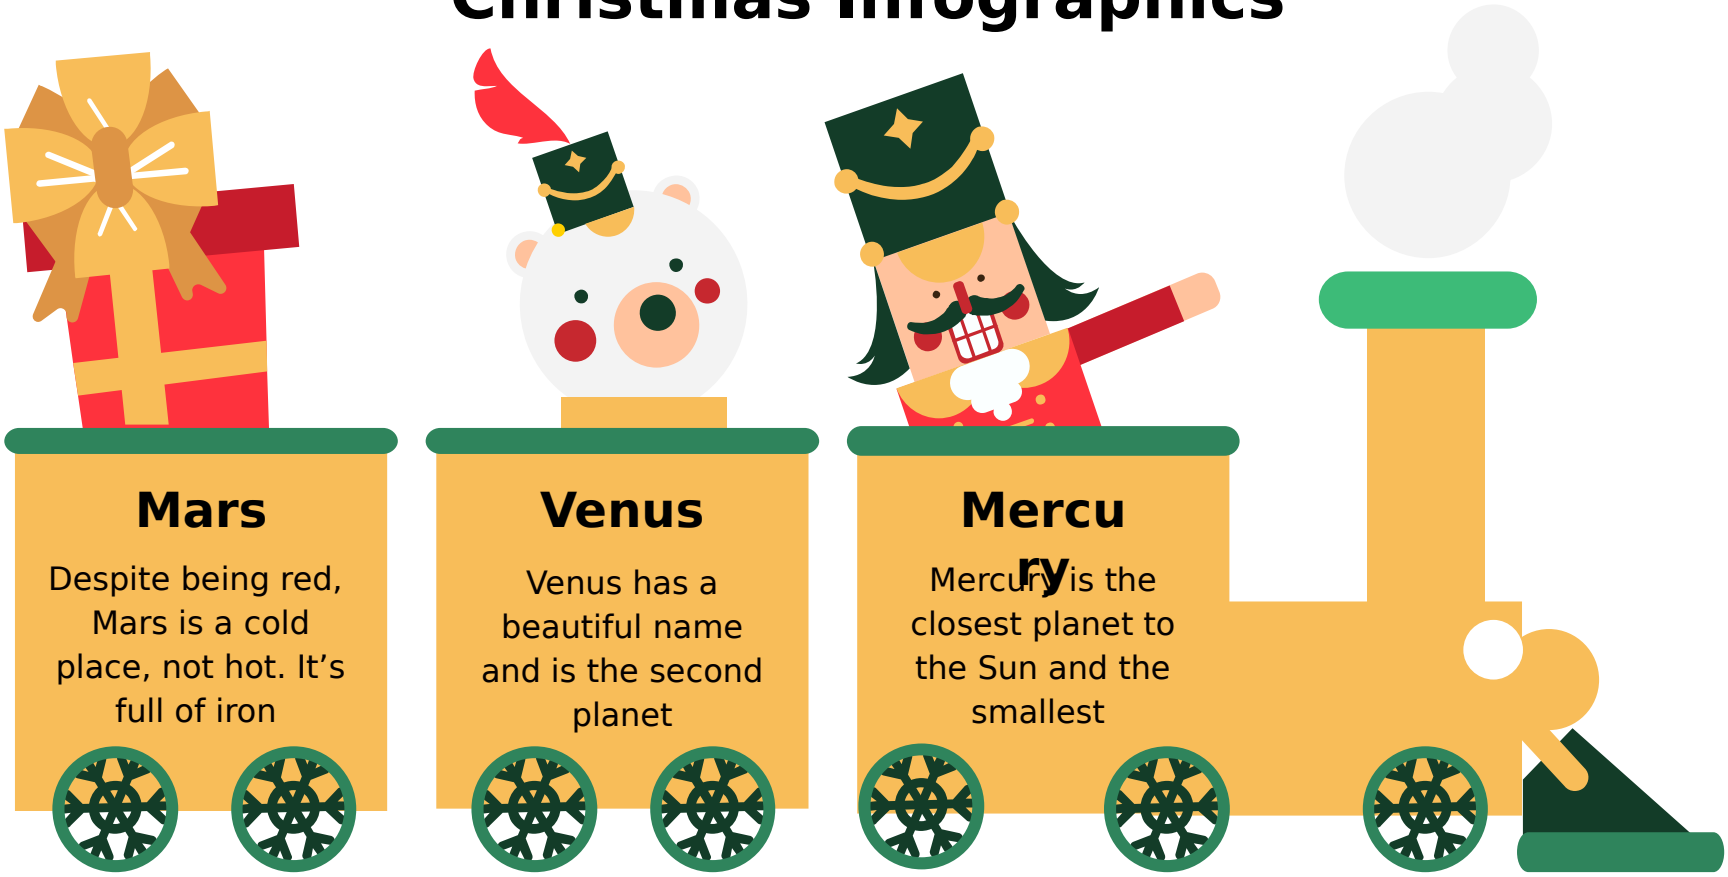

Mars

Despite being red, Mars is a cold place. It's full of iron oxide dust, which gives the planet its reddish cast

Christmas Infographics

Christmas Infographics

Mars

Despite being red, Mars is a cold place, not hot. It’s full of iron

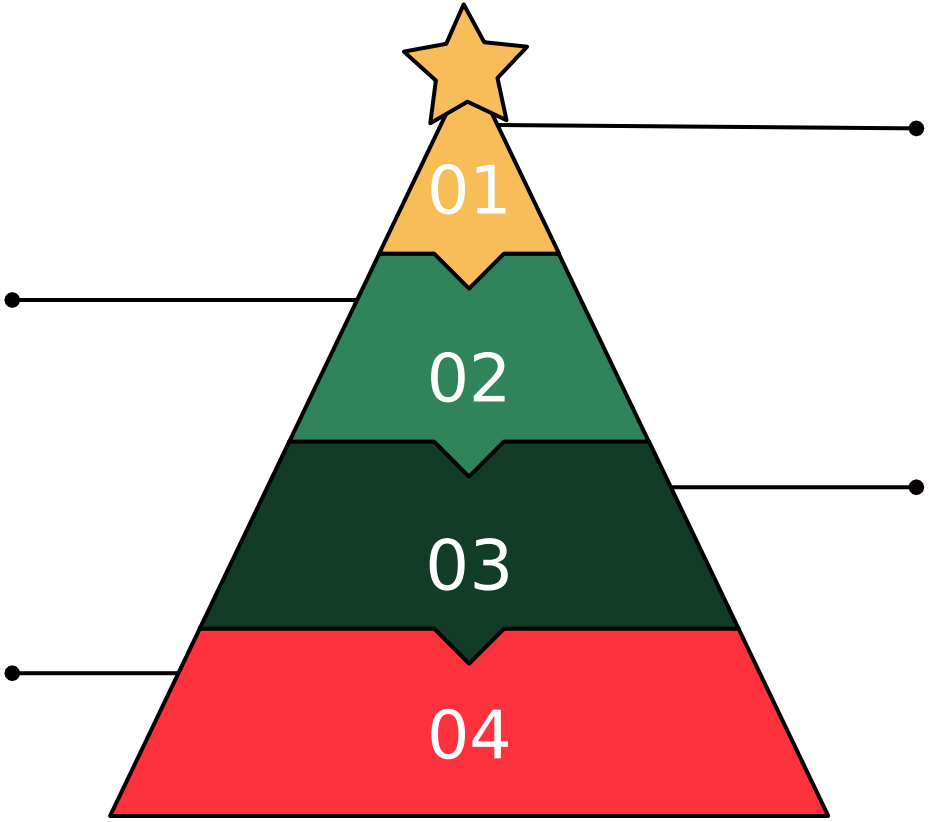

Venus

Venus has a beautiful name and is the second planet

Mercury

Mercury is the closest planet to the Sun and the smallest

Christmas Infographics

Mercury

Mercury is the closest planet to the Sun and the smallest of them all

Neptune

Neptune is the farthest planet from the Sun and the fourth-largest

Mars

Despite being red, Mars is a cold place. It’s full of iron oxide dust

Saturn

Saturn is composed mostly of hydrogen and also helium

Christmas Infographics

Venus

Venus has a beautiful name and is the second one

Mars

Despite being red, Mars is actually a cold place

Jupiter

It’s a gas giant and the biggest planet in the Solar System

Mercury

Mercury is the closest planet to the Sun

Saturn

It’s composed mostly of hydrogen and helium

Christmas Infographics

Neptune

Neptune is the farthest planet from the Sun

Jupiter

Jupiter is a gas giant and the biggest planet

Earth

Earth is the third planet from the Sun

Venus

Venus has a beautiful name and is the second

Mars

Despite being red, Mars is a cold place

Saturn

Saturn is the ringed planet in the Solar System

Christmas Infographics

Saturn

Saturn is a gas giant and has several rings. It’s composed mostly of hydrogen and also helium

Venus

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury

Mars

Despite being red, Mars is a cold place. It’s full of iron oxide dust, which gives the planet its reddish cast

Christmas Infographics

Christmas Eve

Venus has a beautiful name and is the second planet

Christmas Day

Despite being red, Mars is actually a very cold place

New Year's Eve

It's a gas giant and the biggest planet in the Solar System

Three Kings Day

Mercury is the closest planet to the Sun and the smallest one

Christmas Infographics

Mars

Despite being red, Mars is actually a very cold place. It’s full of iron oxide dust

Venus

Venus has a beautiful name and is the second planet. It’s terribly hot

Mercu ry

Mercury is the closest planet to the Sun and the smallest of them all

Instructions for use

In order to use this template, you must credit **Slidesgo** and **Freepik** in your final presentation and include links to both websites.

You are allowed to:

- Modify this template.
- Use it for both personal and commercial projects.

You are not allowed to:

- Sublicense, sell or rent any of Slidesgo Content (or a modified version of Slidesgo Content).
- Distribute Slidesgo Content unless it has been expressly authorized by Slidesgo.
- Include Slidesgo Content in an online or offline database or file.
- Offer Slidesgo templates (or modified versions of Slidesgo templates) for download.
- Acquire the copyright of Slidesgo Content.

For more information about editing slides, please read our FAQs or visit Slidesgo School:

https://slidesgo.com/faqs and https://slidesgo.com/slidesgo-school

Infographics

You can add and edit some **infographics** to your presentation to present your data in a visual

- Choose your favourite infographic and insert it in your presentation using Ctrl C + Ctrl V or Cmd C + Cmd V in Mac.
- Select one of the parts and **ungroup** it by right-clicking and choosing “Ungroup”.
- **Change the color** by clicking on the paint bucket.
- Then **resize** the element by clicking and dragging one of the square-shaped points of its bounding box (the cursor should look like a double-headed arrow). Remember to hold Shift while dragging to keep the proportions.
- **Group** the elements again by selecting them, right-clicking and choosing “Group”.
- Repeat the steps above with the other parts and when you’re done editing, copy the end result and paste it into your presentation.
- Remember to choose the “**Keep source formatting**” option so that it keeps the design. For more info, please visit **Slidesgo School**.
