QUESTION

How many hosts are addressable from the network address 204.168.254.16/25

The initial ARPANET host-to-host protocol was called _____

This access technique that can be used in Wireless LAN is

Data transmitted over the internet uses _____ switching technique

One of these is not a network interface layer protocol used in TCP/IP

One of these protocols is used in the Transport layer of the OSI model

_____ specifies the maximum amount of time a data frame can exist

Each device on a network with n devices using a fully mesh topology has upto ____ I/O ports

A fully connected mesh network has _____ physical channels to connect 5 devices

Optical fibres, unlike wire media, are highly resistant to _____

OPTION A	OPTION B	OPTION C	OPTION D	ANS	TMA NO
120	126	2	32 B		TMA3
Transmission Control	Internet Protocol	User Datagram	Network	CD	TMA3
CSMA/CD	CSMA/CA	Aloha	None of the	B	TMA3
Data	Circuit	Packet	Dual	C	TMA3
RIP	Frame relay	FDDI	ATM	A	TMA3
UDP	ICMP	Apple talk	IP	A	TMA3
TTL	Header checks	Fragment offset	Latency	A	TMA3
$(n-1)/2$	$n-1$	$2(n-1)$	$n(n-1)/2$	B	TMA3
2	4	8	10 D		TMA3
High-frequency	Low-frequency	Electromagnetic	Refraction	C	TMA3
