At the bottom, there are two stylized dark orange foliage sprigs, one on the left and one on the right, growing from a base of larger orange shapes that resemble hills or dunes.

THIS IS A
GREAT
HEADLINE

01. E

And this is the subtitle that makes it
comprehensible

THE SLIDE TITLE GOES HERE!

Do you know what helps you make your point clear?
Lists like this one:

- Because they're simple
- You can organize your ideas clearly
- And because you'll never forget to buy milk!

And the most important thing: the audience won't miss the point of your presentation

MAYBE YOU NEED TO DIVIDE THE CONTENT

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

YOU COULD USE THREE COLUMNS, WHY NOT?

MARS

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust, which gives the planet its reddish cast

JUPITER

It's a gas giant and also the biggest planet in our Solar System. Jupiter is the fourth-brightest object in the sky

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon

A PICTURE ALWAYS REINFORCES THE CONCEPT

Images reveal large amounts of data, so remember: use an image instead of long texts. Your audience will appreciate that
