I. Questions 1-8 (Reading passage)

Direction: Read the following passage carefully and answer the questions below according to the information given in the passage.

Water is the basic necessity for the functioning of all life forms that exist on earth. It is safe to say that water is the reason behind earth being the only planet to support life. This universal solvent is one of the major resources we have on this planet. It is impossible for life to function without water. After all, it makes for almost 70% of the earth.

However, despite its vast abundance, water is very much limited. It is a **non-renewable** resource. In addition, we need to realize the fact that although there is an abundance of water, not all of it is safe to consume. We derive some very essential uses from the water on a daily basis.

If we talk about our personal lives, water is the foundation of our existence. The human body needs water for the day to day survival. We may be able to survive without any food for a whole week but without water, we won't even survive for 3 days. Moreover, our body **itself** comprises of 70% water. This, in turn, helps our body to function normally.

Thus, the lack of sufficient water or consumption of contaminated water can cause serious health problems for humans. Therefore, the amount and quality of water which we consume is **essential** for

our physical health plus fitness. Further, our daily activities are incomplete without water. Whether we talk about getting up in the morning to brush or cooking our food, it is equally important. This domestic use of water makes us very dependent on this transparent chemical.

In addition, on a large scale, the industries consume a lot of water. **They** need water for almost every step of their process. It essential for the production of the goods we use every day. If we look beyond human uses, we will realize how water plays a major role in every living beings life. It is the home of aquatic animals. From a **tiny** insect to a whale, every organism needs water to survive. Therefore; we see how not only human beings but plants and animals too require water. The earth depends on water to function. We cannot be selfish and use it up for our uses without caring about the environment.

1. The reading passage is mainly talking about ---------
