Question

___is the most used forensics method by the police

Answer

figerprint

Question

one of the following is not and cannot be used as DNA sample

Answer

pores

Question

The DNA Profiling technique was first reported in 1984 by___

Answer

Sir Alec Jeffreys

Question

emphasiis on forensics is often towards___despite its academic relevance

Answer

criminal and legal evidence

Question

___knowledge are logically related and each can be inferred from the other.

Answer

scientific

Question

science process skills involves___

Answer

all of the above

Question

identify the odd process below:

Answer

Data spicing

Question

one of the following is not a subdivision of forensic science

---

Answer

divisional forenscis

Question

'of or before the forum” is a maxim that conotes___

Answer

public presentation of evidence

Question

what is forensic science all about?

Answer

method of obtaining criminal evidence

Question

In 1776, Swedish chemist, Scheele devised a way of detecting arsenous oxide in

Answer

corpses

Question

empirical and formal are two broad categories of___

Answer

science

Question

science is meaningless without ____

Answer

practical application

Question

science and scientific knowledge militates against____

Answer

assumptions

Question

Pharmaceutical Science is very key in understanding ___

Answer

drug abuse

Question

Formal Science has a formal and____ character

Answer

deductive

Question

Debriefing, conotes 'sharing of information' ____

Answer

all of the above

Question

“walk through” is a technique used in ____

Answer

conduct scene assessment

Question

it is expected for security personnel to collect___during crime scene investigation

Answer

samples

Question

_____ is often used by manufactures association to identify pirated products

Answer

forensic marking

Question

Question

_____ influences our experiences and assessment of others and communication with them

---

Answer

Perception

Question

_____ contagion means the experience the same feelings that other have

---

Answer

Emotional

Question

The requirement for empathy includes open - mindedness, imagination and _____

Answer

Commitment

Question

The _____ is the object that converts the signal as received into a form that the message received can be comprehended

---

Answer

Decoder

Question

_____ is the most important part of communication

Answer

Listening

Question

____ is the psychological aspect of listening

Answer

Hearing

Question

____refers to the object that connects the message to the actual physical signals that are being sent

---

Answer

Encoder

Question

____ is the ability to experience the world from another person's perspective

---

Answer

Empathy

Question

The process by which communications influence each other's perceptions through communiucation is known as _____

Answer

Negotiation

ENG453

Question

Development is _____

Answer

None of the above

Question

For language study to be relevant, it must concern itself with

Answer

The development of humans

Question

From the point of view of Henderson (1989), the goal of every development is the ____ and the bettering of their conditions.

Answer

Uplift of human persons

Question

In Nigerian language situation, _____ is suited for superiority.

Answer

English

Question

In Nigeria, English is a language of

Answer

All of the above

Question

English language in Nigeria is a product of

Answer

Conquest and foreign invasion

Question

Culture contact refers to

Answer

An interaction between two cultures

Question

A proto language is the _____ from which other languages diversify.

Answer

Original language

Question

Which of these is not Afroasiatic language?

Answer

English

Question

The concept of language family tree points to the similarity in

---

Answer

Meaning and alphabetical composition of certain words in some languages

Question

Identify the odd item in _____

Answer

Kanuri

Question

English language enjoys the status of _____ in Nigeria.

Answer

Official language

Question

In Nigeria, there are _____ major languages.

Answer

3

Question

In Nigeria, there are

Answer

About five hundred languages

Question

Language can perform the function of

Answer

Transmission of culture

Question

Which of the following is not a characteristic of language?

Answer

Wholesomeness

Question

According to Fromkin et al. (2003), the possession of language is an attribute that

---

Answer

Distinguishes humans from other animals

Question

To say that human beings make language implies that

Answer

All of the above

Question

The symbols of language are produced by

Answer

Organs of speech

Question

According to Sapir (1921), the symbols of language are in the first instance

Answer

Auditory

Question

Development is _____

Answer

None of the above

Question

For language study to be relevant, it must concern itself with

ECO440

Question

Positive externalities is associated with___ goods

Answer

None of the options

Question

___ tax is imposed on income whose burden cannot be shifted

Answer

Direct

Question

Direct taxes are imposed on ___

Answer

Income

Question

___ is associated with the free-rider problem

Answer

Public goods

Question

Sources of public revenue is classified into ___ and ____ sources

Answer

Tax and Non- tax

Question

Which of these is not an expenditure theory ?

Answer

Dalton Theory

Question

Public policy is required to regulate, guide, correct, and supplement the working of the ___ in certain aspects

Answer

Economy

Question

Direct taxes strike an individual's income during_____

Answer

Production

Question

Determinants of taxable capacity include all except

Answer

Government expenditure

Question

Clean water, healthcare, good road etcs are examples of ___ goods

Answer

Social goods

Question

Lumpsum tax and advalorem are examples of ____ taxes

Answer

Monopoly Taxes

Question

The process of transferring tax burden from the wholesaler to the retailers, and to the consumers is known as ____

Answer

Shifting

Question

___ tax imposed at every stage of production

Answer

Value added tax

Question

One of these is not a method for financing government activities

---

Answer

Investment

Question

Excise duties are not important source of government ____ in developing countries because the manufacturing sector are still minute

---

Answer

Revenue

Question

In an economy, level of employment and prices is a function of ___

Answer

Level of aggregate demand

Question

___ tax was imposed on Nigerians during the colonial administration

---

Answer

Poll Tax

Question

___ is not a conponent of public receipts

Answer

Government expenditure

Question

___ is associated with income inequality

Answer

Lorenzo curve

Question

A combination of fiscal and monetary policy for certain economic aims is termed ___

Answer

Policy mix

Question

Positive externalities is associated with___ goods

Answer

None of the options

Policy mix

ECO444

Question

High Powered Money is also known as the ___

Answer

Monetary Base

Question

___ system is associated with the Bretton Woods

Answer

Fixed Exchange Rate

Question

The International Monetary Fund is based in ___ ?

Answer

Washington DC

Question

A financial institution that is not supervised by any banking regulatory agency is referred to as ___

Answer

Non Bank Finacial Institution

Question

The Bank for International Settlements was established in ___

Answer

1930

Question

One of the is not an objective of credit control by performed by the Central Bank of Nigeria

---

Answer

Supplying liquidity

Question

The role of financial intermediaries include all except ___

Answer

Money Control

Question

The total amount of bank notes and coins in circulation plus currency reserve held by the commercial banks is referred to as ___

Answer

High Powered Money

Question

___ is not a challenge faced by the Central Bank of Nigeria

Answer

Commercial Bank Control

Question

All are monetary policy instruments except ___

Answer

Money Control

Question

The risk aversion theory of liquidity preference is based on ___

Answer

Portfolio Selection

Question

The buying and selling of securities to the banking and non banking public by the central bank is known as ___

Answer

Open Market Operation

Question

The regulatory body incharge of the Nigerian capital market is the ___

Answer

Security and Exchange Commission

Question

The first pension Act in Nigeria was enacted in ____

Answer

1951

Question

The following are immediate factor determinants of money multiplier except ___

Answer

Demand deposit ratio

Question

The strategy used by the monetary authority to influence banks to adhere to policies and guidelines is known as ___

Answer

Moral Suasion

Question

Symbolically, the fraction of the real money income which people wish to hold in cash as posited by the cash balance approach to the demand for money, is ___

Answer

k

Question

The value of goods and services enjoyed by a firm with payment made at a later date is known as ___?

Answer

Credit

Question

The following are banks limitations to create money except ___

Answer

Demand for cash

Question

James Tobbins is associated with ___ theory of liquidity preference?

Answer

Risk Aversion

Question

High Powered Money is also known as the ___

Answer

Monetary Base

Question

___ system is associated with the Bretton Woods

Answer

Fixed Exchange Rate

Answer

Risk Aversion

ECO452

Question

The mean of sample must always equal to the population mean it’s representing and the variance of the population and sample estimate are equal

Answer

TRUE'

Question

Binomial distribution is usually use to predict occurrence of events that are

Answer

mutually exclusive

Question

A covariate is a continuous variable that correlates with the

Answer

dependent variable

Question

The purpose of ANCOVA is

Answer

To remove unwanted variables in the analysis

Question

An important assumption of ANCOVA is

Answer

All measure are independent

Question

Simple price index number is defined as the sum total of the price of related items

---

Answer

divided by the sum total of its base or reference period.

Question

Fisher index is defined as

Answer

square root of Paashe and Laspeyres index.

Question

The assumptions of multiple regression models include

Answer

Randomness, Normality, Multi-colinearity, Homoscedascity and Linearity

Question

Analysis of covariance (ANCOVA) is a statistical test related to analysis of variance (ANOVA).

Answer

TRUE'

Question

If a coin is tossed 120 times, what is the probability that head will appear between 45% and 55%?

Answer

0.7242

Question

The formular for Normal distribution is

Answer

$Z = (X− \mu)/\sigma$

Question

The normal curve is bell-shaped and symmetrical about its

Answer

mean

Question

The normal distribution as a continuous probability distribution

Answer

Continuous probability distribution

Question

What is the probability of obtaining less than 3 heads in 5 toss of coin

Answer

1.12 heads

Question

What is the probability of obtaining 3 heads in 5 toss of a balanced coin

Answer

0.3125

Question

Binomial distribution is usually use to predict occurrence of events that are

---

Answer

mutually exclusive

Question

If a coin is tossed 120 times, what is the probability that head will appear between 45% and 55%?

Answer

0.7242

Question

Given an infinite population consisting of sample size n. The sampling distribution of proportion is said to have a mean of

---

Answer

np

Question

The mean of sample must always equal to the population mean it’s representing and the variance of the population and sample estimate are equal

---

Answer

TRUE'

Question

The characteristics of the roles expected of statistical research in decision making and policy formulation for societal development

---

Answer

All of the options

Question

ECO448

Question

The First Fundamental Welfare Theorem asserts that market equilibria are ----------

---

Answer

Pareto Efficient

Question

The ------- is an approach for data organisation, reconciliation, and descriptive analysis of the structure of the economy

---

Answer

SAM

Question

Payments without anything in form of exchange which household, corporate and goods and services accounts make to the State account is ----------

---

Answer

Taxes

Question

All payments made by the savings and investments account to the goods and services accounts are ----------

---

Answer

Gross capital formation

Question

In SAM, the block which deals with all agricultural and non-agricultural products traded abroad is----------

---

Answer

Imports and Exports

Question

The block which covers household and State expenditure on food, non-food products and services for end consumption is ----------

---

Answer

End Consumption

Question

The block that deal with payments made from the goods and services accounts to production is----------

---

Answer

Domestic sales

Question

The ------- block refers to payment of factors of production

Answer

value added

Question

The input –output analysis concentrates on an economy which is in ----------

Answer

Equilibrium

Question

According to Prof. J.R. Hicks, ---------- is something which is sold for the enterprise.

Answer

Outputs

Question

According to Prof. J.R. Hicks, ---------- is something which is bought for the enterprise.

Answer

Goods

Question

Prof.Wassily .W.Leontief invented the ---------- technique

Answer

Input-Output

Question

The usefulness of development models to actual economic planning involves the following except ----------

---

Answer

development

Question

One of the follwing is a requirement for a successful planning ----------

---

Answer

statistical data

Question

One of the principal objectives of planning in underdeveloped or less developed countries is to

---

Answer

increase the rate of economic development

Question

One of the three categories of planning models is---------

Answer

decentralized model

Question

The following are the important elements of the development planning models except ----------

---

Answer

Functions

Question

Variables whose values are determined from within the system are ----------

---

Answer

endogenous

Question

Variable are determined from outside the system are -----

Answer

exogenous

Question

According to Jhingan, a model expresses -------- among economic variables

---

Answer

relationships

Question

The First Fundamental Welfare Theorem asserts that market equilibria are ----------

Outputs

Question

According to Prof. J.R. Hicks, ---------- is something which is bought for the enterprise.

Answer

Goods

Question

Prof.Wassily .W.Leontief invented the ---------- technique

Answer

Input-Output

Question

The usefulness of development models to actual economic planning involves the following except ----------

---

Answer

development

Question

One of the follwing is a requirement for a successful planning ----------

---

Answer

statistical data

Question

One of the principal objectives of planning in underdeveloped or less developed countries is to

---

Answer

increase the rate of economic development

Question

One of the three categories of planning models is---------

Answer

decentralized model

Question

The following are the important elements of the development planning models except ----------

---

Answer

Functions

Question

Variables whose values are determined from within the system are ----------

---

Answer

endogenous

Question

Variable are determined from outside the system are -----

Answer

exogenous

Question

According to Jhingan, a model expresses -------- among economic variables

---

Answer

relationships

ECO454

Question

--------- shows the relationship among three or more variables

---

Answer

Multiple Linear model

Question

--------- defined model as any set of assumption and relationships which approximately describe the behaviour of an economy or a sector of an economy

---

Answer

Bergstron

Question

--------- describes the way in which economic variables are interrelated

---

Answer

Economic model

Question

Before the estimated model can be put to use, it is necessary to test its ----------

---

Answer

forecasting power

Question

---------- gives the model a precise form with appropriate signs of the parameters for easy analysis

---

Answer

Model estimation

Question

The -------- allows the researcher to have an idea of the interdependence of the variables under study

---

Answer

theoretical knowledge

Question

---------- presupposes knowledge of economic theory and the familiarity with the particular phenomenon under investigation,

---

Answer

Model Formulation

Question

The stage that involve expressing economic relationships between the given variables in mathematical form is known as ------

---

Answer

Model Formulation

Question

A good knowledge of ---------- will assist in identifying the econometric research structure and the characteristics associated with it

---

Answer

economic theory

Question

In econometric research there are ------- main stages.

Answer

four

Question

The following are example of short term forcasting EXCEPT ---------.

Answer

biennial farm output

Question

The moving is also known as ----------

Answer

rolling average

Question

A ---------- forecasting system treats the total of individual values in each time period as a single item of data

Answer

short-term

Question

A ------ situation is one in which, although observed values fluctuate from one time period to the next, the average value remains steady over a reasonably long period of time

Answer

stationary

Question

------- is generally concerned with data associated with a time period of less than one year

Answer

Forecasting

Question

--------- shows the relationship between two variables

Answer

Simple linear model

Question

The --------- will enable random element that are not accounted for to be taken care of in the sample.

Answer

random disturbance term.

Question

The formulation of an --------- involves the introduction of random disturbance term.

Answer

Econometric model

Question

---------- is built on the basis of economic theory.

Answer

Econometric model

Question

---------- consists of a system of equations which relate observable variables and unobservable random variables using a set of assumptions about the statistical properties of the random variables

---

Answer

Econometric model

Question

--------- shows the relationship among three or more variables

---

Answer

Multiple Linear model

Question

--------- defined model as any set of assumption and relationships which approximately describe the behaviour of an economy or a sector of an economy

---

Answer

Bergstron

Question

--------- describes the way in which economic variables are interrelated

---

Answer

Economic model

Question

Before the estimated model can be put to use, it is necessary to test its ----------

---

Answer

forecasting power

Question

---------- gives the model a precise form with appropriate signs of the parameters for easy analysis

---

Answer

Model estimation

Question

The -------- allows the researcher to have an idea of the interdependence of the variables under study

---

Answer

theoretical knowledge

Question

---------- presupposes knowledge of economic theory and the familiarity with the particular phenomenon under investigation,

---

Answer

Model Formulation

Question

The stage that involve expressing economic relationships between the given variables in mathematical form is known as ------

Answer

Model Formulation

Question

A good knowledge of ---------- will assist in identifying the econometric research structure and the characteristics associated with it

Answer

economic theory

Question

In econometric research there are ------- main stages.

Answer

four

Question

The following are example of short term forcasting EXCEPT ---------.

Answer

biennial farm output

Question

The moving is also known as ----------

Answer

rolling average

Question

A ---------- forecasting system treats the total of individual values in each time period as a single item of data

Answer

short-term

Question

A ------ situation is one in which, although observed values fluctuate from one time period to the next, the average value remains steady over a reasonably long period of time

Answer

stationary

Question

------- is generally concerned with data associated with a time period of less than one year

Answer

Forecasting

Question

--------- shows the relationship between two variables

Answer

Simple linear model

Question

The --------- will enable random element that are not accounted for to be taken care of in the sample.

Answer

random disturbance term.

Question

The formulation of an --------- involves the introduction of random disturbance term.

Answer

Econometric model

Question

---------- is built on the basis of economic theory.

Answer

Econometric model

Question

---------- consists of a system of equations which relate observable variables and unobservable random variables using a set of assumptions about the statistical properties of the random variables

---

Answer

Econometric model

ECO459

Question

An _____ is one in which a variable occurs in the exponent

Answer

exponential equation

Question

A _____ is called an algebraic equation in which each term is either a constant or the product of a constant is a single variable

---

Answer

linear equation

Question

Leibniz in ____ and Gabriel Gramer derived Gramer’s rule for solving the theory of linear systems by using Gaussian elimination.

Answer

1963

Question

The study of linear algebra first emerges from the study of determination that were used in solving different systems of linear ____

Answer

equations

Question

_____ is also central to both pure and applied mathematics

Answer

Linear algebra

Question

____ is the branch of mathematics concerning vector space and linear mappings between such spaces

Answer

Linear algebra

Question

___ are defined as the rate of change of other quantities such as derivatives of displacement with respect to time or gradients of quantities which is how they enter differential equations

---

Answer

quantities

Question

A ____ containing one or more functions of one independent variable and its derivatives

---

Answer

differential equation

Question

A _____ is any equation which derivate, either ordinary derivatives or partial derivatives.

Answer

differential equation

Question

Given P = 18000 – 2000k, C = 2000 per unit, calculate the profit maximization output

---

Answer

4

Question

The ____ problem facing a decision – making unit is further classified into unconstrained and constrained problems

---

Answer

optimization

Question

____ deals with the determination of extreme values which could be maximum or minimum for the goal (objective) variable

---

Answer

Optimization

Question

Theories of trade cycles have been advocated only through the introduction of _____

Answer

dynamic economics

Question

Economic problems concerning continuous change of economic variables and path of change can be studied only in _____

Answer

dynamic economics

Question

After 1925, dynamic economics became popular not only in business fluctuations but also in the determination of income and _____

Answer

growth models

Question

_____ does not show the path of change of the old to new equilibrium

---

Answer

Comparative economic statics

Question

_____ is the study of an economy in which rates of output are changing

---

Answer

Economic dynamics

Question

_____ refers to a state where there is a change such as movement

Answer

Dynamics

Question

The concept of dynamics is derived from ____

Answer

Physics

Question

Since the end of the nineteenth century, economic analysis has been fairly rigidly compartmentalized into statics and _____

Answer

dynamics

Question

An _____ is one in which a variable occurs in the exponent

Answer

exponential equation

Question

A _____ is called an algebraic equation in which each term is either a constant or the product of a constant is a single variable

---

Answer

linear equation

Question

Leibniz in ____ and Gabriel Gramer derived Gramer’s rule for solving the theory of linear systems by using Gaussian elimination.

Answer

1963

Question

The study of linear algebra first emerges from the study of determination that were used in solving different systems of linear ____

Answer

equations

Question

_____ is also central to both pure and applied mathematics

Answer

Linear algebra

Question

____ is the branch of mathematics concerning vector space and linear mappings between such spaces

---

Answer

Linear algebra

Question

___ are defined as the rate of change of other quantities such as derivatives of displacement with respect to time or gradients of quantities which is how they enter differential equations

---

Answer

quantities

Question

A ____ containing one or more functions of one independent variable and its derivatives

---

Answer

differential equation

Question

A _____ is any equation which derivate, either ordinary derivatives or partial derivatives.

Answer

differential equation

Question

Given P = 18000 – 2000k, C = 2000 per unit, calculate the profit maximization output

Answer

4

Question

The ____ problem facing a decision – making unit is further classified into unconstrained and constrained problems

Answer

optimization

Question

____ deals with the determination of extreme values which could be maximum or minimum for the goal (objective) variable

Answer

Optimization

Question

Theories of trade cycles have been advocated only through the introduction of _____

Answer

dynamic economics

Question

Economic problems concerning continuous change of economic variables and path of change can be studied only in _____

Answer

dynamic economics

Question

After 1925, dynamic economics became popular not only in business fluctuations but also in the determination of income and _____

Answer

growth models

Question

_____ does not show the path of change of the old to new equilibrium

---

Answer

Comparative economic statics

Question

_____ is the study of an economy in which rates of output are changing

---

Answer

Economic dynamics

Question

_____ refers to a state where there is a change such as movement

---

Answer

Dynamics

Question

The concept of dynamics is derived from ____

Answer

Physics

Question

Since the end of the nineteenth century, economic analysis has been fairly rigidly compartmentalized into statics and _____

Answer

dynamics

Question

An _____ is one in which a variable occurs in the exponent

Answer

exponential equation

Question

A _____ is called an algebraic equation in which each term is either a constant or the product of a constant is a single variable

---

Answer

linear equation

Question

Leibniz in ____ and Gabriel Gramer derived Gramer’s rule for solving the theory of linear systems by using Gaussian elimination.

Answer

1963

Question

The study of linear algebra first emerges from the study of determination that were used in solving different systems of linear ____

Answer

equations

Question

_____ is also central to both pure and applied mathematics

Answer

Linear algebra

Question

____ is the branch of mathematics concerning vector space and linear mappings between such spaces

---

Answer

Linear algebra

Question

___ are defined as the rate of change of other quantities such as derivatives of displacement with respect to time or gradients of quantities which is how they enter differential equations

---

Answer

quantities

Question

A ____ containing one or more functions of one independent variable and its derivatives

Answer

differential equation

Question

A _____ is any equation which derivate, either ordinary derivatives or partial derivatives.

Answer

differential equation

Question

Given P = 18000 – 2000k, C = 2000 per unit, calculate the profit maximization output

Answer

4

Question

The ____ problem facing a decision – making unit is further classified into unconstrained and constrained problems

Answer

optimization

Question

____ deals with the determination of extreme values which could be maximum or minimum for the goal (objective) variable

---

Answer

Optimization

Question

Theories of trade cycles have been advocated only through the introduction of _____

Answer

dynamic economics

Question

Economic problems concerning continuous change of economic variables and path of change can be studied only in _____

Answer

dynamic economics

Question

After 1925, dynamic economics became popular not only in business fluctuations but also in the determination of income and _____

Answer

growth models

Question

_____ does not show the path of change of the old to new equilibrium

---

Answer

Comparative economic statics

Question

_____ is the study of an economy in which rates of output are changing

---

Answer

Economic dynamics

Question

_____ refers to a state where there is a change such as movement

---

Answer

Dynamics

Question

The concept of dynamics is derived from ____

Answer

Physics

Question

Since the end of the nineteenth century, economic analysis has been fairly rigidly compartmentalized into statics and _____

Answer

dynamics

ECO449

Question

QUALITY ADJUSTED LIFE YEARS as a healthcare evaluation programme can equally be tagged

Answer

Cost-utiliy analysis

Question

The payment made to a REFERRAL hospital on behalf of a CONTRIBUTOR is called

Answer

fee-for-service

Question

In the workings of NHIS, a CONTRIBUTOR can change HEALTHCARE PROVIDER after a period of

Answer

183 days

Question

Accessible healthcare via national health insurance scheme (NHIS) will ensure

Answer

productive economy

Question

One of the fall-out of rising user charge in Nigeria is

Answer

rising demand for alternatve medicine

Question

What economic implication can you deduce from budgetary allocation that favours RECURRENT EXPENDITURE to detriment of CAPITAL EXPENDITURE in the HEALTH sector?

Answer

dwindling standard of public health

Question

Outside community sponsored insurance scheme as a form health insurance scheme (HIS), another is

Answer

local

Question

Most foreign aid of healthcare funding is from

Answer

development institutions

Question

The commonest form of healthcare funding in developing nations is

Answer

direct finanacing

Question

Economy can influence health via

Answer

safe water

Question

What economic implication can you deduce from budgetary allocation that favours RECURRENT EXPENDITURE to detriment of CAPITAL EXPENDITURE in the HEALTH sector?

Answer

dwindling standard of public health

Question

Outside community sponsored insurance scheme as a form health insurance scheme (HIS), another is

---

Answer

local

Question

Most foreign aid of healthcare funding is from

Answer

development institutions

Question

The commonest form of healthcare funding in developing nations is

---

Answer

direct finanacing

Question

Economy can influence health via

Answer

safe water

Question

Is ill-health linked to unproductiveness?, _____

Answer

Yes

Question

Increase in cost of healthcare is occasioned by ____

Answer

disease burden

Question

The burden of fund on health sector is the focus of _____

Answer

health economists

Question

Rising burden of health issues is reason for study of health economics, _____

Answer

True

Question

Increasing attention on health economics is as a result of _____

Answer

changing from human perspective to research model

Question

QUALITY ADJUSTED LIFE YEARS as a healthcare evaluation programme can equally be tagged

Answer

Cost-utiliy analysis

Question

The payment made to a REFERRAL hospital on behalf of a CONTRIBUTOR is called

Answer

fee-for-service

Question

In the workings of NHIS, a CONTRIBUTOR can change HEALTHCARE PROVIDER after a period of

---

Answer

183 days

Question

Accessible healthcare via national health insurance scheme (NHIS) will ensure

---

Answer

productive economy

Question

One of the fall-out of rising user charge in Nigeria is

Answer

rising demand for alternatve medicine

Question

What economic implication can you deduce from budgetary allocation that favours RECURRENT EXPENDITURE to detriment of CAPITAL EXPENDITURE in the HEALTH sector?

Answer

dwindling standard of public health

Question

Outside community sponsored insurance scheme as a form health insurance scheme (HIS), another is

Answer

local

Question

Most foreign aid of healthcare funding is from

Answer

development institutions

Question

The commonest form of healthcare funding in developing nations is

Answer

direct finanacing

Question

Economy can influence health via

Answer

safe water

Question

What economic implication can you deduce from budgetary allocation that favours RECURRENT EXPENDITURE to detriment of CAPITAL EXPENDITURE in the HEALTH sector?

Answer

dwindling standard of public health

Question

Outside community sponsored insurance scheme as a form health insurance scheme (HIS), another is

Answer

local

Question

Most foreign aid of healthcare funding is from

Answer

development institutions

Question

The commonest form of healthcare funding in developing nations is

Answer

direct finanacing

Question

Economy can influence health via

Answer

safe water

Question

Is ill-health linked to unproductiveness?, _____

Answer

Yes

Question

Increase in cost of healthcare is occasioned by ____

Answer

disease burden

Question

The burden of fund on health sector is the focus of _____

Answer

health economists

Question

Rising burden of health issues is reason for study of health economics, _____

Answer

True

Question

Increasing attention on health economics is as a result of _____

Answer

changing from human perspective to research model

Question

QUALITY ADJUSTED LIFE YEARS as a healthcare evaluation programme can equally be tagged

Answer

Cost-utiliy analysis

Question

The payment made to a REFERRAL hospital on behalf of a CONTRIBUTOR is called

Answer

fee-for-service

Question

In the workings of NHIS, a CONTRIBUTOR can change HEALTHCARE PROVIDER after a period of

Answer

183 days

Question

Accessible healthcare via national health insurance scheme (NHIS) will ensure

Answer

productive economy

Question

One of the fall-out of rising user charge in Nigeria is

Answer

rising demand for alternatve medicine

Question

What economic implication can you deduce from budgetary allocation that favours RECURRENT EXPENDITURE to detriment of CAPITAL EXPENDITURE in the HEALTH sector?

Answer

dwindling standard of public health

Question

Outside community sponsored insurance scheme as a form health insurance scheme (HIS), another is

---

Answer

local

Question

Most foreign aid of healthcare funding is from

Answer

development institutions

Question

The commonest form of healthcare funding in developing nations is

---

Answer

direct finanacing

Question

Economy can influence health via

Answer

safe water

ECO441

Question

The indicators of HDI includes

Answer

All

Question

The growth theory that linked technological change to the production of knowledge is _____.

Answer

new growth theory

Question

Which theory explains how labour increasingly moves away from the agricultural sector to the industrial sector

Answer

two-sector model

Question

The following are part of economy wide planning model except_____

Answer

micro models

Question

Planning by _____ is democratic planning and is achieved by manipulating the market.

Answer

inducement

Question

The type of planning that entails complete absence of laissez-faire and is an integral part of a socialist society is _____

Answer

planning by direction

Question

Which of the following is the rational for planning in developing countries?

Answer

removing unemployment

Question

The above definition was given by_____

Answer

Jhingan

Question

A deliberate control and direction of the economy in other to achieving definite targets and objectives within a specific period

---

Answer

Economic planning

Question

Proper economic development planning should be a priority so as to understand the following problems except_____

Answer

depreciation

Question

The elements of sustainable development does not include

Answer

environmental degradation

Question

The education index of the HDI includes

Answer

All

Question

_____ model includes input-output, social accounting and computable general equilibrium (CGE) models

---

Answer

multi-sector models

Question

Economic _____gives the planner a clear direction to follow on a projected

---

Answer

development models

Question

Budget can be classified under what type of planning?

Answer

annual planning

Question

_____ planning involves long range targets for a period of 15, 20, or 25 years

---

Answer

perspective

Question

_____ is a situation where resources are not fully utilized.

Answer

Unemployment

Question

The main objective of every economic planning is to achieve _____

Answer

economic development

Question

The objectives of economic planning are outlined by_____

Answer

Pooja Mehta.

Question

For a definite plan to be actualised, there must be any of the following

Answer

all

Question

The indicators of HDI includes

Answer

All

Question

The growth theory that linked technological change to the production of knowledge is _____.

Answer

new growth theory

Question

Which theory explains how labour increasingly moves away from the agricultural sector to the industrial sector

---

Answer

two-sector model

Question

The following are part of economy wide planning model except_____

Answer

micro models

Question

Planning by _____ is democratic planning and is achieved by manipulating the market.

Answer

inducement

Question

The type of planning that entails complete absence of laissez-faire and is an integral part of a socialist society is _____

Answer

planning by direction

Question

Which of the following is the rational for planning in developing countries?

Answer

removing unemployment

Question

The above definition was given by_____

Answer

Jhingan

Question

A deliberate control and direction of the economy in other to achieving definite targets and objectives within a specific period

Proper economic development planning should be a priority so as to understand the following problems except_____

Answer

depreciation

ECO447

Question

Public good theory was developed by

Answer

Paul Samuelson

Question

Excessive use of club good results in negative externalitie that affects users

Answer

false

Question

A tax system where revenue equals running expenditure is ___

Answer

adequate

Question

A tax system that has _____ is Equitable

Answer

ability to pay

Question

State-owned business is _____

Answer

government significant control of ownership

Question

The followings are public entities in Nigeria except, _____

Answer

DISCO

Question

A business entity with larger shares owned by the people is _____

Answer

public limited company

Question

government ownership of business entities is the focus of _____

Answer

public sector economics

Question

Traditionally, public sector economics is concerned with _____

Answer

market failiure

Question

The visible hands link to economic regulation are associated with ___

Answer

the government

Question

The nature of the action in 'question 9' is _____

Answer

negative

Question

The effect of of oil spilage on economic activities of people is known as _____

Answer

externality

Question

The sudden abnormal rise in crude oil price which cause sizeable jumps in Nigeria revenue in the middle of fiscal year can linked to

Answer

Wiseman-Peacock Hypothesis

Question

economic growth and public spending is the foucus of _____

Answer

Wagner' law

Question

Taxation helps to redistribute _____

Answer

income

Question

Public expenditure is an economic policy tool which manipulates bank rates to to stabilize the Nigeria economy

Answer

False

Question

Politic in Nigeria contribute to increase public spending , ____

Answer

True

Question

Public spendings at a time were thought to be wasteful, _____

Answer

true

Question

Consolidated account is meant for _____ t

Answer

money from laon repayment

Question

To spend out of consolidated account, ____ approval is needed Parliament approval is required for issues related with ____

Answer

parlamentry

Question

Public good theory was developed by

Answer

Paul Samuelson

Question

Excessive use of club good results in negative externalitie that affects users

Answer

false

Question

A tax system where revenue equals running expenditure is ___

Answer

adequate

Question

A tax system that has _____ is Equitable

Answer

ability to pay

Question

State-owned business is _____

Answer

government significant control of ownership

Question

The followings are public entities in Nigeria except, _____

Answer

DISCO

Question

A business entity with larger shares owned by the people is _____

Answer

public limited company

Question

government ownership of business entities is the focus of _____

Answer

public sector economics

Question

Traditionally, public sector economics is concerned with _____

Answer

market failiure

Question

The visible hands link to economic regulation are associated with ___

Answer

the government

Question

The nature of the action in 'question 9' is _____

Answer

negative

Question

The effect of of oil spilage on economic activities of people is known as _____

Answer

externality

Question

The sudden abnormal rise in crude oil price which cause sizeable jumps in Nigeria revenue in the middle of fiscal year can linked to

Answer

Wiseman-Peacock Hypothesis

Question

economic growth and public spending is the foucus of _____

Answer

Wagner' law

Question

Taxation helps to redistribute _____

Answer

income

Question

Public expenditure is an economic policy tool which manipulates bank rates to to stabilize the Nigeria economy

Answer

False

Question

Politic in Nigeria contribute to increase public spending , ____

Answer

True

Question

Public spendings at a time were thought to be wasteful, _____

Answer

true

Question

Consolidated account is meant for _____ t

Answer

money from laon repayment

Question

To spend out of consolidated account, ____ approval is needed Parliament approval is required for issues related with ____

Answer

parlamentry

Question

Public good theory was developed by

Answer

Paul Samuelson

Question

Excessive use of club good results in negative externalitie that affects users

Answer

false

Question

A tax system where revenue equals running expenditure is ___

Answer

adequate

Question

A tax system that has _____ is Equitable

Answer

ability to pay

Question

State-owned business is _____

Answer

government significant control of ownership

Question

The followings are public entities in Nigeria except, _____

Answer

DISCO

Question

A business entity with larger shares owned by the people is _____

Answer

public limited company

Question

government ownership of business entities is the focus of _____

Answer

public sector economics

Question

Traditionally, public sector economics is concerned with _____

Answer

market failiure

Question

The visible hands link to economic regulation are associated with ___

Answer

the government

Question

The nature of the action in 'question 9' is _____

Answer

negative

Question

The effect of of oil spilage on economic activities of people is known as _____

Answer

externality

Question

The sudden abnormal rise in crude oil price which cause sizeable jumps in Nigeria revenue in the middle of fiscal year can linked to

Answer

Wiseman-Peacock Hypothesis

Question

economic growth and public spending is the foucus of _____

Answer

Wagner' law

Question

Taxation helps to redistribute _____

Answer

income

Question

Public expenditure is an economic policy tool which manipulates bank rates to to stabilize the Nigeria economy

Answer

False

Question

Politic in Nigeria contribute to increase public spending , ____

Answer

True

Question

Public spendings at a time were thought to be wasteful, _____

Answer

true

Question

Consolidated account is meant for _____ t

Answer

money from laon repayment

Question

To spend out of consolidated account, ____ approval is needed Parliament approval is required for issues related with ____

Answer

parlamentry

ECO427

Question

the cold war was over in -------

Answer

1991

Question

The philosopher -------, however, believed that reality was idealistic rather than materialistic

---

Answer

Hegel

Question

The communist countries of the former Soviet Union, Eastern Europe, and China were -------

---

Answer

Marxist

Question

a command economy is ------- in nature,

Answer

centralize

Question

A ------- system is an economic system based solely on demand and supply, and there is little or no government regulation

---

Answer

free market

Question

The socialist economic system is also regarded as ------- economy

---

Answer

command

Question

A ------- economy is a type of economic system where supply and demand regulate the economy, rather than government intervention.

Answer

market

Question

a socialist economy is also called a --------

Answer

planned economy

Question

history tells us that early Islam promulgated capitalist economic policies, which migrated to Europe through trade partners from cities such as -------

---

Answer

Venice

Question

an economic system where private individuals controls the economic resources of the economy is known as --------

---

Answer

capitalism

Question

The term "stock" is derived from the Old English word for stump or -------

---

Answer

tree trunk

Question

In a fundamental sense, ------- consists of any produced thing that can enhance a person's power to perform economically useful work

---

Answer

capital

Question

The fundamental problem faced by all societies is -------

Answer

scarcity

Question

The ------- is more perishable than other factors of production

---

Answer

Labour

Question

The -------- system gave power and ownership of resources to anybody who occupy larger expanse of land and as such the person will have power to control the remaining community people

---

Answer

Feudal

Question

The -------- good here refer to goods made by people for the purpose of increasing production

Answer

Capital

Question

The decision of answering the basic question of what to produce, how to produce, for whom to produce and the type of technological inputs etc is also a concern for the ---------

Answer

state

Question

The productive contribution made by the people is called ------

Answer

labour

Question

The individual household economic decision is based firstly on his level of -------

Answer

income

Question

The word "economy" is derived from the Greek word -------

Answer

oikos

Question

the cold war was over in -------

Answer

1991

Question

The philosopher -------, however, believed that reality was idealistic rather than materialistic

Answer

Hegel

Question

The communist countries of the former Soviet Union, Eastern Europe, and China were -------

Answer

Marxist

Question

a command economy is ------- in nature,

Answer

centralize

Question

A ------- system is an economic system based solely on demand and supply, and there is little or no government regulation

---

Answer

free market

Question

The socialist economic system is also regarded as ------- economy

---

Answer

command

Question

A ------- economy is a type of economic system where supply and demand regulate the economy, rather than government intervention.

Answer

market

Question

a socialist economy is also called a --------

Answer

planned economy

Question

history tells us that early Islam promulgated capitalist economic policies, which migrated to Europe through trade partners from cities such as -------

---

Answer

Venice

Question

an economic system where private individuals controls the economic resources of the economy is known as --------

---

Answer

capitalism

Question

The term "stock" is derived from the Old English word for stump or -------

---

Answer

tree trunk

Question

In a fundamental sense, ------- consists of any produced thing that can enhance a person's power to perform economically useful work

---

Answer

capital

Question

The fundamental problem faced by all societies is -------

Answer

scarcity

Question

The ------- is more perishable than other factors of production

---

Answer

Labour

Question

The -------- system gave power and ownership of resources to anybody who occupy larger expanse of land and as such the person will have power to control the remaining community people

Answer

Feudal

Question

The -------- good here refer to goods made by people for the purpose of increasing production

ECO453

Question

What is the purpose of unit root test ?

Answer

To determine stability of a variable.

Question

What does a Durbin-Watson stat value of 1.824903 indicates?

Answer

Presence of autocorrelation

Question

Probability value must be _____ and very close to zero

Answer

significant

Question

The_____ is normally surposed to be zero

Answer

mean

Question

A Stochastic random variable could be continuous in time or _____ in time.

Answer

discrete

Question

Which of the followings is not a source of deviations in parameter model estimation?

Answer

Addition of variable(s)

Question

What does β1 stands for in a simple model like GDP = β0 + β1XCR + U.

Answer

An intercept

Question

What does β0 stands for in a simple model like GDP = β0 + β1XCR + U.

Answer

An intercept

Question

In econometric research there are _____ main stages

Answer

four

Question

Econometricians try to find estimators that have desirable statistical properties including unbiasedness, _____, and consistency.

Answer

efficiency

Question

What is data collected on several individuals/units at one point in time called?

Answer

Cross-sectional data

Question

What is data collected on one individual/unit over several time periods called?

Answer

Time series data

Question

From the regression model in question 8, what term best describes the variable XCR?

Answer

The regressor

Question

Given the model, LNGDP = F (OPV, DOP, MPR, XCR, M2, INF). Which variable is dependent?

Answer

LNGDP

Question

Determination of _____ length can be done either by using: (i) Schwarz Criterion or (ii) Akaike information Criterion

Answer

lag

Question

A survey which seeks to determine a subjective health rating will follow thus; (5) Excellent (4) Very Good (3) Good (2) Fair (1) Poor. This is an example of _____.

Answer

Ordered category

Question

Consequences of Serial Correlation include all of the following EXCEPT _____.

Answer

The OLS estimators are still biased and consistent

Question

Which of the following is NOT an example of continuous variable?

Answer

Number of male or female Students

Question

The OLS estimates of a model yields the following value for GDP with coefficient of -0.86572 and probality value of 0.0001. What can be deduced from the value of the probability for the parameter GDP?

Answer

It is insignificant

Question

The stationarity tests for GDP, inflation and exchange rates are respectively: I(0), I(1) and I(2). Which of these variables is stable at first difference?

Answer

Inflation rate

Question

What is the purpose of unit root test ?

Answer

To determine stability of a variable.

Question

What does a Durbin-Watson stat value of 1.824903 indicates?

Answer

Presence of autocorrelation

Question

ECO431

Question

How is low income elasticity of demand denoted?

Answer

Ey<1

Question

If P > AVC, a firm under Perfect Competition is expected to -------

Answer

continue operation

Question

If P < AVC, a firm under Perfect Competition is expected to -------

Answer

close down

Question

------- and ------- are production periods

Answer

longrun, short run

Question

The algebraic function Q = F (K, L), imply

Answer

production function

Question

The algebraic function C = F (Q), imply

Answer

cost function

Question

cost and outlay are one and same

Answer

FALSE

Question

------- is the opportunity cost associated self employed resources in the business

Answer

implicit cost

Question

------- comprises clear cut historical payments or money outlays for input bought or hired by the firm.

Answer

Explicit cost

Question

One of the following laws is short run concept.

Answer

law of variable proportion

Question

The Cobweb model is a -------- model

Answer

dynamic

Question

What do Economists call a person's maximum willingness to pay for something?

Answer

That person's reservation price

Question

Demand is a multivariate relationship, that is, it is determined by many factors _____.

Answer

simultaneously

Question

Planting decisions of farmers are largely determined by what?

Answer

The relative prices of different crops

Question

The monetary gain obtained by Grace Abel because she is able to purchase a product for a price that is less than the highest price that she would be willing to pay is called what?

Answer

Consumer surplus

Question

One of these is NOT an example of substitute goods

Answer

Bread and tea

Question

A function that establishes relationship between input and output is called
---

Answer

production function

Question

A person's maximum willigness to pay for a commodity is known as ----------

---

Answer

reservation price

Question

The principle that ochestrates that prices adjust until the market is cleared ---------- principle

---

Answer

equilibrium

Question

The principle that guide selection of consumption pattern best for consumer is ---------- principle

---

Answer

optimisation

Question

How is low income elasticity of demand denoted?

Answer

Ey<1
