

GRADE MATHS FOR GRADE FOUR

DIVISION

- ▶ Division mean sharing what we have equally
- ▶ a sign of division
- ▶ $AB=C$ A is called dividend
B is called divisor
C is called quotient

for example :- 64

4 is divisor and
16 is quotient

- ▶ Sometimes after we divide we get some number left that number is called REMAINDER
for example:- 65
- ▶ DIVISION IS A RESPROCAL OF MULTIPLICATION

Answer the following question

1)56

2)63

3)939=

4)100 4=

GEOMETRY

- ▶ GEO mean **earth** and metry mean **measurement** so geometry mean measuring earth
- ▶ When we measure we measure:-
 - Length by **meter**
 - Angle by **protractor**
- ▶ To make **circle** we use pair **compass**
- ▶ To make **straight line** in free space we use **set square**

Quadrilaterals and triangle

► Quadrilateral is four sided figure they are:-

1) **Rectangle**:- rectangle is four sided figure which two opposite side are parallel and equal

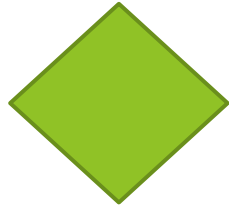

2) **square**:- it's a rectangle which both for sides are equal

3) **Rhombus**:- is four side which both sides are equal_

RHOMBUS

TRIANGLE

- ▶ Its three side figure having three vertice
- ▶ There are 3 kinds of triangle they are:-

1) Equilateral:- is a triangle where all the three side are equal

2) Isosceles:- at least two side are equal

3) Scalene triangle:- all sides are not equal
