Tier 1 Bank

Negotiation Agreement Scenario's

*Setting up accounts in a **"Tier 1 bank"** after your RV to create instant **"Interest Wealth"** from multiple accounts, while creating new accounts as you go on. This document will explain the procedure to S**tart**, M**anage** and G**row** your wealth on a fast track while never touching the principle deposits.*

*Prepare yourself before going to your appointment with this document and the graph to get the best interest rates and bank perks you can by being **"The Boss"** of how your money works for you, not against you.*

This document is for the negotiating of interest rates as well as banking perks for setting up account(s) within the Tier 1 bank below. The amount of funding not to exceed $5,000,000.00 per account, multiple accounts will be created.

*My advice is to setup **"2 accounts"** up to **"$5,000,000.00"** each, also you will need to negotiate the interest rate and bank perks that these accounts will carry onward as they are being created. As time goes on you can re-negotiate rates and perks to fit your needs.*

*Lets say you negotiated the rate of **"1%"** on **"$5,000,000.00"** for "**2 accounts**" that was created. See graphs from the attached sheet(s) to get the bigger picture of how this works in **(G1 and G2)**.*

G1 – *Initial Startup of 2 Accounts.*

G2 – Future Scenario's building accounts after limits have been met, repeat this process over and over until you feel it is complete for your goals.

*Attached example sheet(s) **(G1 and G2)** of how I will be doing my **"Tier 1 bank"** negotiations on the RV exchange day.*

Those of you that have requested help on your RV negotiations, I think this document will get the point across to the Bank manager on how this should go

in your favor. Stand your ground and Hold your line, remember the banks can no longer leverage your money for their benefit.
