Physics unit 3

BBO set by Andualem(AZA)

- Deformation is change of shape or size of an object.
- External forces applied on an object cause deformation.
- Elastic deformation a reversible deformation.
- Plastic deformation non reversible deformation.
- Density is a characteristic property of any pure substance.
- S.G is the ratio of the density of substance to the density of reference substance..
- Stress is a magnitude force causing deformation.
- Strain the amount of an object deformed.
- Y.M constant proportionality.
- A boday is in equilibrium when it remains ethier uniform motion or at rest.
- Set by Andualem

1. Live in the present
2. Make mistakes
3. Value people
4. Do what is right
5. Be open to learning
6. Follow your curiosity
7. The imagination is powerful
8. Work Towards the Impossible
9. Learn the rules & then play better
10. Knowledge Comes From Experience
