

Here is where your presentation begins

A subtitle can make this more comprehensible

This is a quote.
Words full of wisdom that someone important said and can make the reader get inspired.”

—Someone famous

Whoa !

It could be the part of the presentation where you can introduce yourself, write your email...

1.This is a great headline

And this is the subtitle that makes it comprehensible

The slide title goes here!

Do you know what helps you make your point clear? Lists like this one:

1. Because they’re simple
2. You can organize your ideas clearly
3. And because you’ll never forget to buy milk!

And the most important thing: the audience won’t miss the point of your presentation

Maybe you need to divide the content

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it’s only a bit larger than our Moon. The planet’s name has nothing to do with the liquid metal

VENUS

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous

You could use three columns, why not?

MARS

Despite being red, Mars is a cold place, not hot. The planet is full of iron oxide dust

JUPITER

It’s the biggest planet in our Solar System and the fourth-brightest object in the sky

SATURN

Yes, this is the ringed one. It’s a gas giant, composed mostly of hydrogen and helium

Sometimes, reviewing concepts is a good idea

VENUS

Venus has a beautiful name, but it’s terribly hot, even hotter than Mercury

MERCURY

Mercury is the closest planet to the Sun and is only a bit larger than our Moon

MARS

Despite being red, Mars is a cold place, not hot. The planet is full of iron oxide dust

JUPITER

It’s a gas giant and the fourth-brightest object in the sky

SATURN

Yes, this is the ringed one. It’s a gas giant, composed mostly of hydrogen and helium

NEPTUNE

Neptune is the fourth-largest planet in our Solar System and the farthest from the Sun

A picture always reinforces the concept

Images reveal large amounts of data, so remember: use an image instead of long texts. Your audience will appreciate that

A picture is worth a thousand words

Fantastic words

Because key words are great for catching your audience’s attention

This is a map

With some important
for this presentation
facts you can highlight

A timeline always works fine

Venus has a beautiful name, but it’s terribly hot

Mercury is the closest planet to the Sun

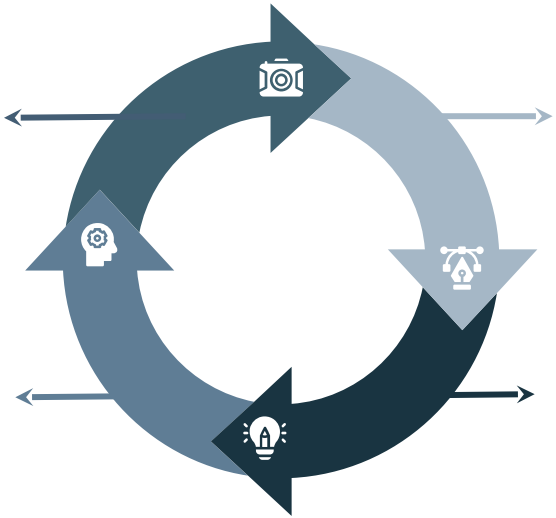

Jupiter is the biggest planet in our Solar System

Despite being red, Mars is a cold place, not hot

Infographics make your idea understandable…

NEPTUNE
Neptune is the fourth-largest planet in our Solar System

VENUS
Venus has a beautiful name, but it’s terribly hot, even hotter than Mercury

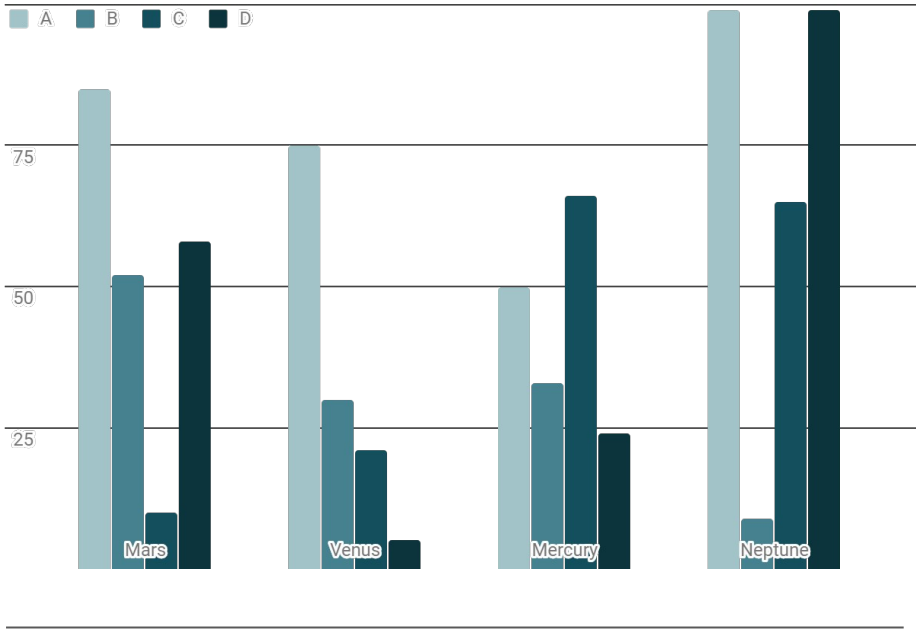

MERCURY
Mercury is the closest planet to the Sun and is only a bit larger than our Moon

JUPITER
It’s a gas giant and the biggest planet in our Solar System

… and the same goes for tables

	MASS (earths)	DIAMETER (earths)	SURFACE GRAVITY (earths)
MERCURY	0,06	0,38	0,38
MARS	0,10	0,60	0,53
SATURN	9,54	9	7,8

Display data in graphs

If you want to **modify this graph**, click on it, follow the link,
change the data and replace it

DAY 1
Mercury is the closest planet to the Sun and is only a bit larger than our Moon

DAY 2
Neptune is the fourth-largest planet in our Solar System

DAY 3
Venus has a beautiful name, but it’s terribly hot, even hotter than Mercury

DAY 4
Jupiter is a gas giant and the biggest planet in our Solar System

9,256,147,158

Big numbers catch your audience’s attention

333,000.00

earths is the Sun’s mass

24h 37m 23s

is Jupiter’s rotation period

386,000 km

is the distance between the Earth and the Moon

Key words are great for catching your audience’s attention

Day

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it’s only a bit larger than our Moon

Day

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot and its atmosphere is extremely poisonous

MARS

Despite being red, Mars is a cold place, not hot. It’s full of iron oxide dust, giving the planet its reddish cast

SATURN

Yes, this is the ringed one. It’s a gas giant, composed mostly of hydrogen and helium

JUPITER

It’s the biggest planet in our Solar System and the fourth-brightest object in the sky

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System

A picture always reinforces the concept

Images reveal large amounts of data quickly, so remember: use an image instead of long texts. Your audience will appreciate that
