

The background features a complex network of thin grey lines and dots, forming a web-like structure. Scattered throughout are various triangles of different sizes and orientations, some with solid grey outlines and others with dashed or dotted outlines. The overall aesthetic is clean, modern, and tech-oriented.

TECH NEWSLETTER

Here is where your presentation begins

CONTENTS OF THIS TEMPLATE

Here's what you'll find in this Slidesgo template:

1. A slide structure based on a newsletter, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. A **thanks** slide, which you must keep so that proper credits for our design are given.
3. A **resources** slide, where you'll find links to all the elements used in the template.
4. **Instructions for use.**
5. Final slides with:
 - The **fonts and colors** used in the template.
 - A selection of **illustrations**. You can also customize and animate them as you wish with the online editor. Visit **Storyset** to find more.
 - More **infographic resources**, whose size and color can be edited.
 - Sets of **customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature,

ANNOUNCEMENTS

You can enter here the subtitle if you need it

1st ANNOUNCEMENT

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

2nd ANNOUNCEMENT

MARS

Despite being red, Mars is a cold place, not hot

NEPTUNE

Neptune is the farthest planet from the Sun, the fourth-largest in our Solar System

JUPITER

It's a gas giant and the biggest planet in our Solar System

SATURN

Saturn is a gas giant, composed of hydrogen and helium

02

IN DEPTH

IN DEPTH

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon.

The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

IN DEPTH

If you want to modify these graphs, click on them, follow the link, change the data and replace them

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

MARY RUIZ

Neptune is the farthest planet from the Sun and the fourth-largest in our Solar System

JONATHAN DOE

Mercury is the closest planet to the Sun and the smallest one in our Solar System

JOHN SMITH

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust, which gives the planet its reddish cast

MINA HAWKINS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

AWESOME WORDS

The background features a complex network of thin grey lines connecting various-sized dark grey circular nodes. These nodes are scattered across the page, with a higher concentration on the right side, creating a web-like or molecular structure. The overall aesthetic is minimalist and modern.
